

GENERAL CATALOGUE

SOLUTIONS THROUGH TECHNOLOGY

EDITO

TECHNOR® is a worldwide technology company of MARECHAL ELECTRIC GROUP, with operational businesses in Italy, United Arab Emirates and Singapore, and is leader in the **design and manufacture of luminaires, enclosures and electrical panels for potentially explosive atmospheres.**

TECHNOR® has a high level of experience in developing and designing Ex equipment for most applications.

These include offshore oil installations, refineries, petrochemical plants, ships and FPSOs, chemical, pharmaceutical, food industries as well as other industries in which explosible dusts might represent a hazard, such as foodstuffs manufacture grain silos and textile.

Products enable safe transport and application of electric signals and power in hazardous areas. The core business is in the electrical, instrumentation and electronics fields.

All the equipment for use in explosive atmosphere satisfy the requirements of international and national regulations (Atex, IECEx and Gost) and each individual systems' component is certified in accordance with specific Ex-certification requirements.

TECHNOR®'s product range and geographic locations nicely complement those of the MARECHAL ELECTRIC GROUP, providing significant product and distribution channel synergies.

65 Years of expertise in the industrial electrical equipment

Founded in 1952, the MARECHAL ELECTRIC Group counts among the major players in Low Voltage LT electrical connection systems in industrial environments with or without the presence of an ATEX explosive atmosphere. With a consolidated turnover of nearly €100 million, its operational and/or sales subsidiaries in Europe, America, Asia, the Middle East, Africa and Australia, offer the best products and local services to the most demanding customers. A workforce of nearly 500 worldwide includes R&D, manufacturing and commercial development skills. The product range is intended for all sectors of industrial activity where safety and endurance are required.

→ INTERNATIONAL COVERAGE

The MARECHAL ELECTRIC Group has an international presence with its own sales forces in more than 20 countries and a strong network of global partners and distributors. Its production, assembly and sales subsidiaries allow MARECHAL® to maintain a close relationship with its customers in more than 100 countries.

10 subsidiaries at your service:

MARECHAL ELECTRIC S.A.S (Head office - France)

MELTRIC Corporation (USA)

MARECHAL ELECTRIC Africa (Pty) Limited (South Africa)

MARECHAL ELECTRIC Asia Pte Ltd (Asia)

MARECHAL AUSTRALIA Pty Ltd (Australia)

TECHNOR Italsmea (Italy)

MARECHAL GmbH (Germany)

TECHNOR Middle East DMCC (Middle East).

MARECHAL CHINA

Our history

Since its creation in 1952, MARECHAL ELECTRIC is a French family business, independent, committed to its customers, its employees and its suppliers.

The company is specialized in the manufacture of low voltage electrical connectors from 5A to 700A, as well as electrical solutions for potentially explosive atmospheres through the TECHNOR® brand.

Our customers benefit from MARECHAL® products designed to ensure safety, durability, performance, ease of use and energy efficiency.

The company offers products under two complementary brands MARECHAL® and TECHNOR® with the same level of quality requirement worldwide. Committed to this approach, MARECHAL ELECTRIC has remained since 1952 an example of success, offering products of unrivalled quality, resulting from the research and development that make the reputation of the French electrical industry. The principles of MARECHAL ELECTRIC The principles of MARECHAL ELECTRIC stands also for collaboration based on trust, proximity with partners, suppliers, customers and employees.

Our research strategy revolves around 4 main approaches:

→ THE SAFETY AND RELIABILITY OF OUR PRODUCTS

Boasting of a unique level of know-how, MEG first and foremost prioritises the safety of the individuals in the facilities and during the use and maintenance of its equipments. Their design goes hand in hand with sustainability and performance over the long-term, irrelevant of the number of operations, outer environment or conditions of use.

→ OPTIMISING THE MODULAR DESIGN

MEG offers its customers the possibility of customising the functions and modular assembly options for its products. For large-scale projects, a dedicated Specific Equipments Technical Team is available to support the customer for their projects so as to offer a comprehensive solution.

→ ENRICHING PARTNERSHIP DEVELOPMENTS WITH ITS CUSTOMERS

MEG is present on turnkey markets and the close partnerships developed with all market actors enables us to grow and to continuously develop our product portfolio. We are therefore constantly improving the performances and functions of our products to exceed our customers' expectations.

→ COMPLYING WITH INTERNATIONAL REGULATIONS

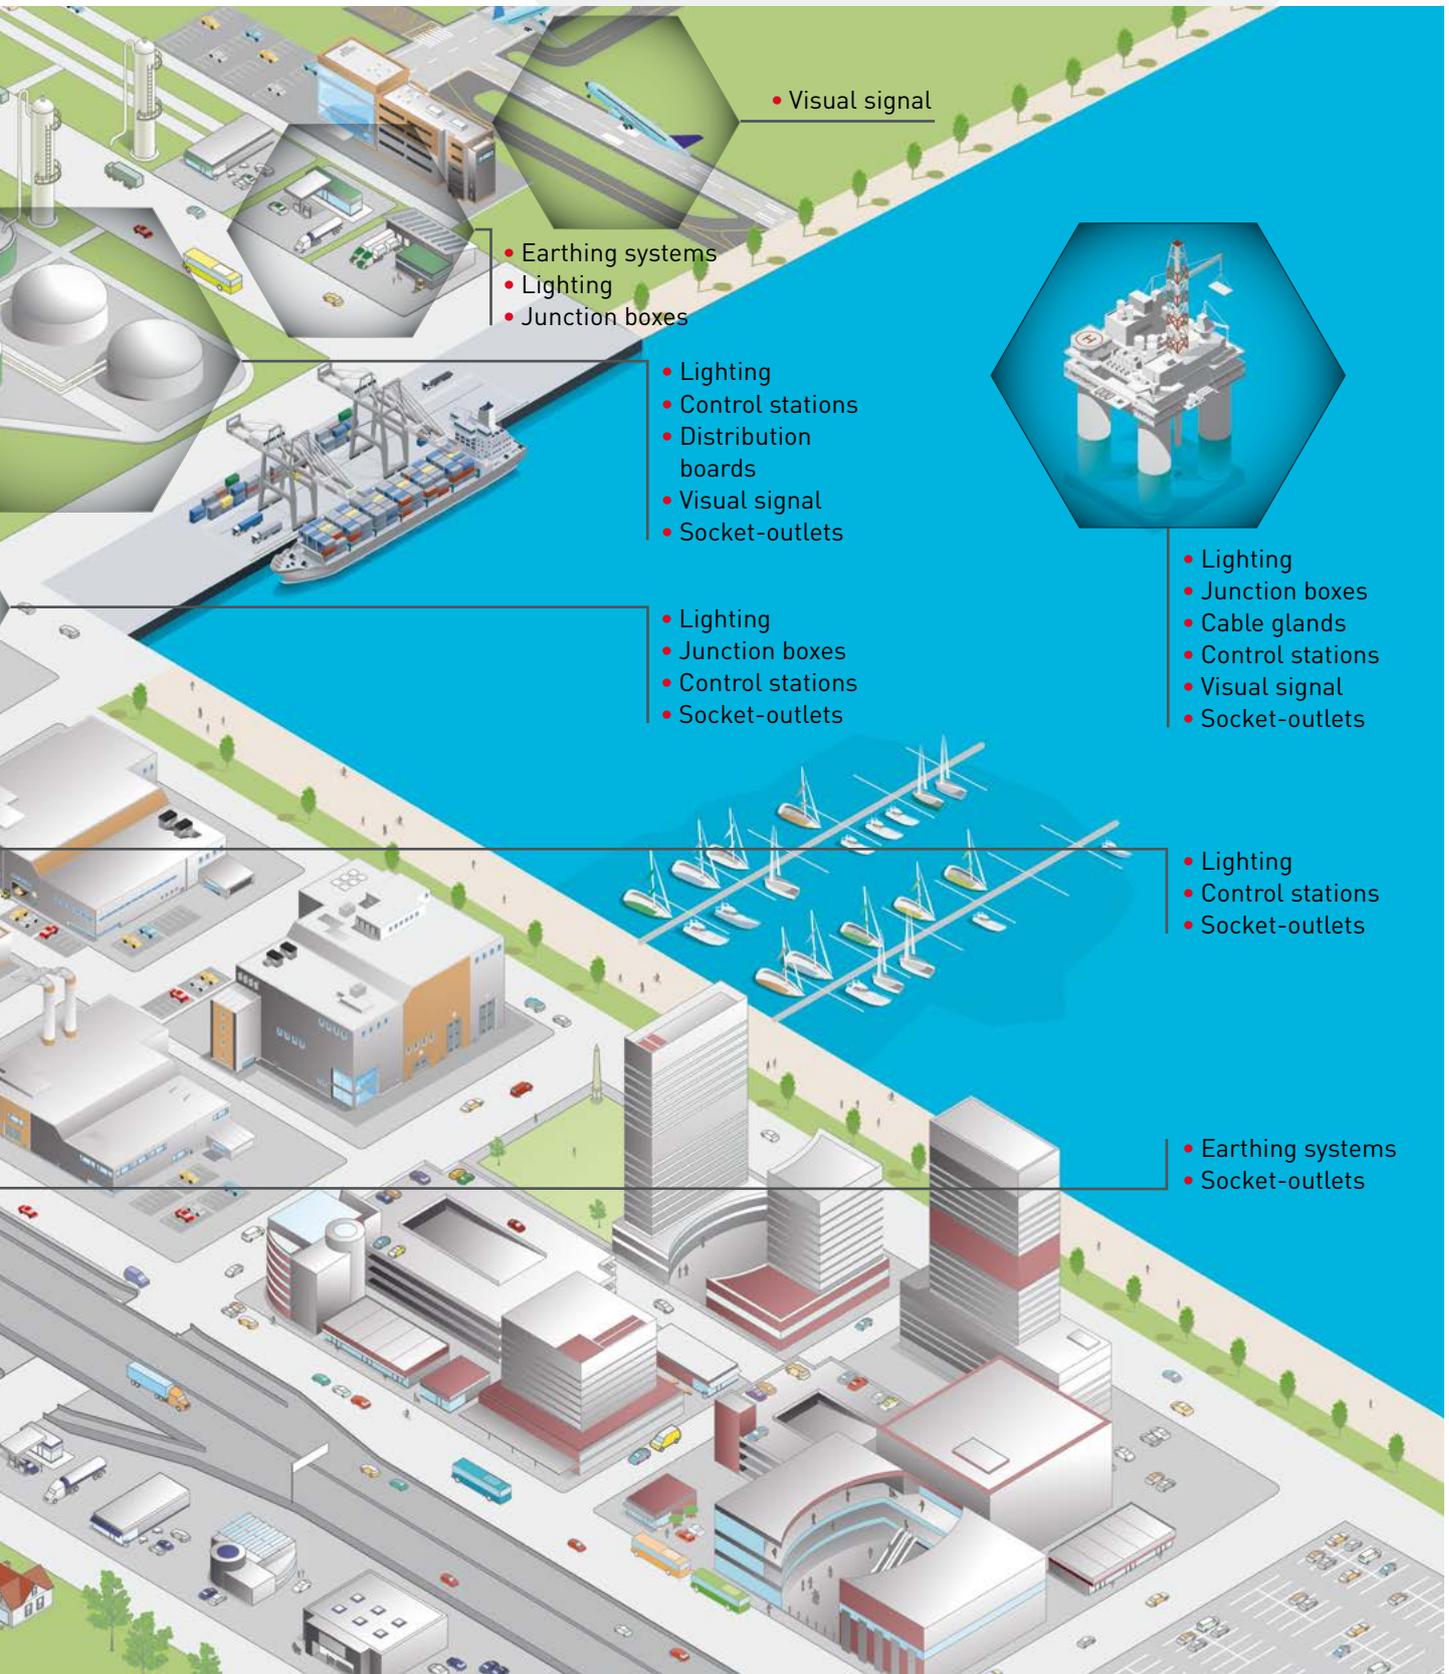

TECHNOR® APPLICATIONS FIELDS

European ATEX Directive

→ EUROPEAN DIRECTIVE 2014/34/EU

ATEX Directive 2014/34/EU is a "new approach" directive that applies to protective systems against explosions as well as all equipment used in or related to explosive atmospheres, such as electrical and non-electrical equipment, components and safety, control and adjusting devices that are necessary for the safe operation of those equipment and protective systems. As a "new approach" directive, the 2014/34/EU Directive defines the essential requirements for the safety and health which shall be respected by all manufacturers. Devices falling within the scope of the European Directive and answering to the essential requirements for the safety and health are identified by a marking plate on which the  logo appears.

→ EUROPEAN DIRECTIVE 1999/92/EC

- The 1999/92/EC Directive aims to improve the safety and health protection of workers who may be exposed to potentially explosive atmospheres.
- The site manager has the obligation:
- to prevent the formation of explosive atmospheres or if this is not possible, prevent ignition of explosive atmospheres,
- to assess the specific risks arising from explosive atmospheres ; to draw up and keep up to date an explosion protection document,
- to classify places where explosive atmospheres may occur into zones,
- to mitigate the detrimental effects of an explosion to protect the health and safety of workers (install appropriate equipment, take organizational measures such as staff training, ...).

International scheme : IECEx

IECEx Scheme: A voluntary certification scheme complying with international standards for electrical and non-electrical equipment for use in explosive atmospheres.

Its aim is to facilitate the international flow of equipment intended to be used in potentially explosive atmospheres (in compliance with one or more international standards

defining the type of protection against the risk of explosion) and thus avoiding multiple national certifications and at the same time ensuring an appropriate level of safety. The IECEx certification scheme allows the manufacturers of "Ex proof" equipment to obtain a Certificate of Conformity that would be accepted in Member States in which this certification scheme is recognized.

Hazardous areas

→ EXPLOSION

An explosion is a release of energy (mechanical, chemical...) in a sudden and often violent manner with high temperature and high pressure due to oxidation or another exothermic reaction.

→ EXPLOSIVE ATMOSPHERE

An explosive atmosphere is a result of the mixture with air, under atmospheric conditions, and flammable substances in the form of gas, vapor, dust, fibers or flyings which, after ignition, permits self-sustaining propagation.

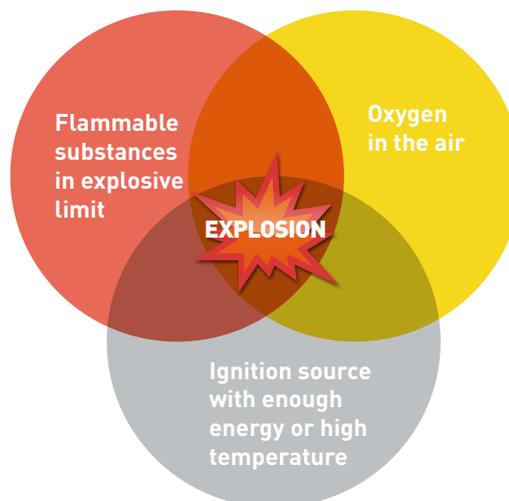

→ A POTENTIALLY EXPLOSIVE ATMOSPHERE

An atmosphere is defined as potentially explosive when its usual composition is not explosive, but due to unforeseen circumstances, it can vary to such an extent that it becomes explosive (the danger exists as a potential state). Main foreseeable circumstances are as follow:

- various stages of a manufacturing process,
- incidents or accidents (rupture of a pipe-line, leak, supply loss),
- meteorological conditions (high ambient temperature, air movements).

Ex REGULATIONS

→ CONDITIONS FOR EXPLOSION

→ AREAS CLASSIFICATION DEFINED BY DIRECTIVE 1999/92/EC

Probability of ATEX presence	Very High	High and Normal	Low
Definition	Location where an explosive atmosphere is present continuously or for a long period or frequently.	Location in which an explosive atmosphere occurs occasionally during normal operation.	Location where an explosive atmosphere is not liable to occur during normal operation or, if it does, is only short-lived (foreseeable abnormal operation).
Zoning for gas & vapours (1999/92/EC)	Zone 0	Zone 1	Zone 2
Zoning for dust & fiber (1999/92/EC)	Zone 20	Zone 21	Zone 22

→ ATEX/IECEX CLASSIFICATION

ATEX Category	IEC protection Level (EPL)	Zone of installation	Atmosphere
1G	Ga	0	GAS
2G	Gb	1	
3G	Gc	2	
1D	Da	20	DUST
2D	Db	21	
3D	Dc	22	
M1	Ma	MINING	COAL DUST METHANE
M2	Mb		

→ GAS AND VAPOURS EXPLOSION

In general, the substances, gases, liquids or vapors which can be at the origin of explosion are:

- heating gas,
- hydrocarbons,
- glue and adhesive solvents,
- varnishes and resins,
- manufacturing additives for pharmaceutical products, artificial dyes, aromas and perfumes,
- manufacturing agents for the following materials : plastics, rubbers, man-made textiles and chemical cleaning products,
- products used in the treatment and manufacturing of alcohols and derivatives...

→ DUST EXPLOSION

Organic and metallic products which create powder and dust form can also in certain conditions become active agents of an explosion.

These are powders and dust of:

- magnesium,
- aluminum,
- sulfur,
- cellulose,
- corn starch,
- epoxy resins,
- polystyrenes,
- dust of plastic,
- coal,
- wood,
- medics,
- sugar (icing sugar),
- flour...

→ GAS AND VAPOURS CLASSIFICATION AND TEMPERATURE CLASSIFICATION

Gases are divided into

- three groups by IEC/EN standards
- four groups by the CEC (Canadian Electrical Code) and the NEC (National Electrical Code - US) standards.

The groups defined in European, International and North American standards are fundamentally the same, as illustrated by the following table.

Gas group		Typical gas
En/IEC	North America	
IIC	A	Acetylene
IIC	B	Hydrogen
IIB	C	Ethylene, Ethyl ether, Cyclopropane, Butadene 1-3
IIA	D	Propane, Ethane, Butane, Heptane, Acetone, Ethyl Alcohol

IEC/EN defined a temperature classification for materials used in hazardous areas. CEC and NEC have also been modified to include a temperature classification.

Temperatures (°C)	Temperature Classification	
	For IEC/EN	For North America
450	T1	T1
300	T2	T2
280	T2	T2A
260	T2	T2B
230	T2	T2C
215	T2	T2D
200	T3	T3
180	T3	T3A
165	T3	T3B
160	T3	T3C
135	T4	T4
120	T4	T4A
100	T5	T5
85	T6	T6

Ex REGULATIONS

→ DUST CLASSIFICATION

IEC/EN defined a classification of dust:

Dust group	Definition		
	Dust type	Size	Resistivity
IIIA	combustible flyings	> 500 µm	-
IIIB	non-conductive dust	≤ 500 µm	> 10 ³ Ω.m
IIIC	conductive dust	≤ 500 µm	≤ 10 ³ Ω.m

→ EXAMPLES OF FLAMMABLE SUBSTANCES

Gas/Vapors	Boiling temperature	Flash point	Self-ignition temperature	Ideal conditions for explosion LEL - UEL	Temperature class	Gas group
Formaldehyde (= Methanal)	-6°C	60°C	424°C	7% - 73%	T2	IIB
Ether	35°C	-45°C	175°C	1.7%-39.2%	T4	IIB

Presentation of most common types of protection

→ FLAMEPROOF « Ex d » EQUIPMENT

A flameproof equipment offers an enclosure in which the parts which can ignite an explosive gas atmosphere can be placed. It withstands the pressure developed during an internal explosion of an explosive mixture, and prevents the transmission of the explosion to the explosive gas atmosphere surrounding the enclosure.

A flameproof enclosure must meet three criteria:

- Contain an internal explosion without permanent distortions.
- Guarantee that the explosion cannot be transmitted to the surrounding atmosphere.
- Have a temperature at any points on the surface that is lower than the self ignition temperature of the surrounding gases or vapours.

There are two construction values which are essential for a flameproof equipment to answer to the 3 criteria:

- the length of flameproof gasket (L)
- the gap (i)

These values depend on gas group and the maximum allowed gap depends on the length of flameproof gasket.

It is necessary to lubricate the thread and to ensure that at least 5 threads are engaged for metric thread and that 5 threads are present on each parts for NPT threads.

Holes which are not used for cable entries must be blanked using the appropriate blanking plugs.

The equipment is supplied with the lubricated gasket. When the equipment is installed, the flamespaths must be lubricated to keep it in good condition. Use a non-hardening, anti-corrosive grease (see technical note).

In order to successfully retain the flameproof character of the equipment:

- Care must be taken before starting up to ensure that all the screws for closing the covers and cable entries are firmly tightened and that the blocking device is well screwed, if necessary.
- Modification of the original predrilled holes is prohibited.

→ INCREASED SAFETY « Ex e » EQUIPMENT

Method of protection applicable to electrical equipment such as light fittings, sockets, switches, etc, which consists of preventing the occurrence of any accidental ignition.

The construction principles for increased safety « e » equipment are as follows:

- Use of high-quality insulation materials
- Specially dimensioned clearance and creepage distance
- Electrical connection which cannot become loose
- Minimum IP54 weatherproof protection of the enclosure
- Respect of the temperature classes
- Conformity of cable entries
- Labelling.

These principles are respected by screwing the cable gland directly onto the enclosure or, for untapped holes, by fixing with a locknut. Holes which are not used for cable entries must be blanked using the appropriate blanking plugs.

The equipment has a protection level of at least IP 54; it is therefore important to ensure that the sealing gasket is in good condition when the product is installed.

Defective seals must be systematically replaced.

It is important to be sure that the gasket is properly positioned for the plugs and sockets and for all the luminaries before connecting the male and female parts (for plugs and sockets) and before closing the light transmitting part of the lighting fixture.

For the connection, all technical note or instruction sheet shall be followed.

→ PRODUCTS MARKED « Ex de »

Except «Ex d» enclosure, equipment having a combined protection type « d » and « e » are the most commonly used. Some apparatuses such as power sockets, lampholders, etc, which create arcs and sparks in normal operation, can't be designed only with protection mode « e ».

- The part where the electric arc is produced is enclosed in a small flameproof chamber.
- The connection terminals are « e » increased safety.
- The assembly is mounted in an « e » increased safety enclosure.

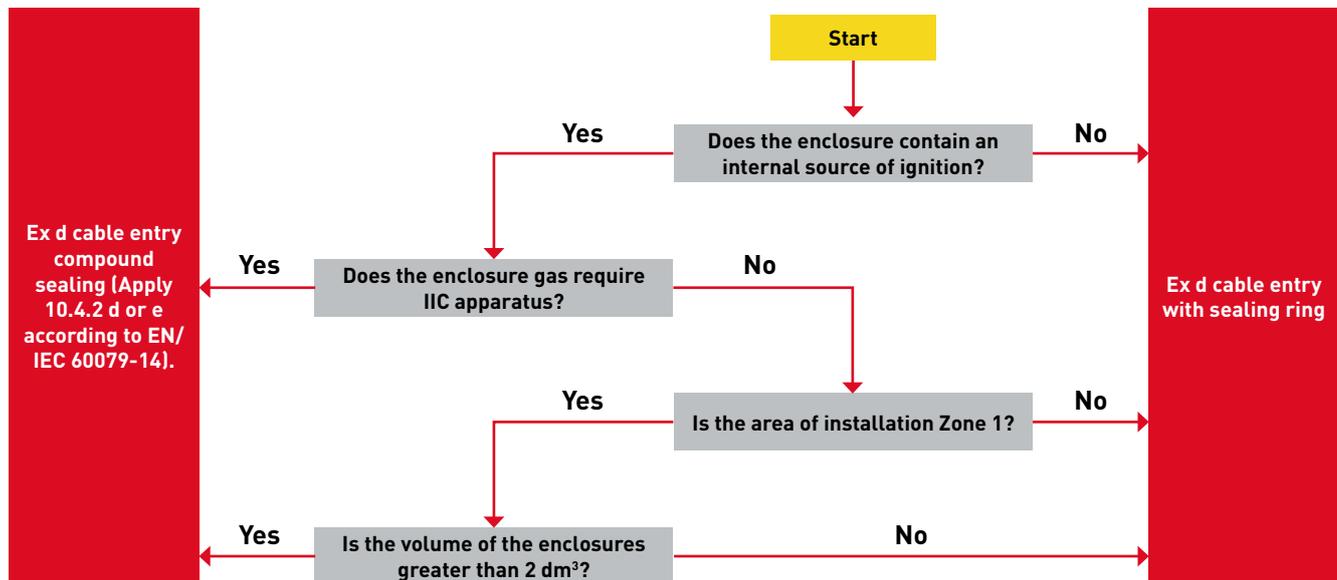

Cables entries

The connection of cables to the electrical equipment shall maintain the explosion protection integrity of the relevant type of protection. When the cable gland certificate has an 'X' marking, this cable gland shall only be used for fixed installations. When the equipment is only portable, cable glands without 'X' marking shall be used.

Cable Entries into Ex d Enclosures

Two situations can be considered, direct cable entry (Ex d enclosures) and indirect cable entry (Ex d e enclosures - on Ex e part).

For the direct cable entry, to choose the correct cable gland the scheme shall be followed if it is not tested with the equipment.

Installation recommendation

→ GENERAL REQUIREMENTS

Electrical installations for explosive atmosphere must comply with the requirements concerning installations in both non hazardous and hazardous locations:

- national rules (Example NFC 15-100 + condition BE3 for France),
- EN/IEC 60079-14,
- IEC/EN 60079-17.

→ EQUIPMENT SELECTION (EXCEPT CABLE ENTRIES)

Zones	Type of protection		Marking	EN/IEC standard
-	General requirements		-	60079-0
For use in Zones 1, 2	Flameproof enclosure		Ex d	60079-1
For use in Zones 1, 2	Increased safety		Ex e	60079-7
For use in Zones 0, 1, 2, 20, 21, 22	Intrinsic safety		Ex i	60079-11
For use in Zones 1, 2	Pressurisation		Ex p	60079-2
For use in Zones 0, 1, 2, 20, 21, 22	Encapsulation		Ex m	60079-18
For use in Zones 1, 2	Oil immersion		Ex o	60079-6
For use in Zones 1, 2	Powder filling		Ex q	60079-5
For use in Zone 2	"Non sparking"		Ex n	60079-15
For use in Zones 20, 21, 22	Dust atmospheres		Ex t	60079-31

Ex REGULATIONS

→ EXTERNAL INFLUENCES

The material must be selected and installed so that it is protected against external, chemical, mechanical, thermal and electrical influences, vibrations, humidity, etc., which are likely to counteract the protection modes provided.

→ PROTECTION AGAINST DANGEROUS SPARKS

Limitation of earth fault currents. It is difficult to cover all systems, but the methods presented in EN/IEC 60079-14 represent general cases.

These systems can be used in Zones 1 and 2 up to 1 000 V~/1 500 V. (Low voltage equipment).

Nota: the equipment intended to be used in explosive atmosphere are not in the scope of LVD 2006/95/EC dated 12/12/2006.

→ EQUALIZATION OF POTENTIALS

All exposed conductive parts and all extraneous metallic parts must be connected to the equipotential connection system.

The connection system may comprise protective conductors,

metal pipes in metal cable ducts and metallic structural elements, but must not include the neutral conductor.

It must be impossible for connections to come loose by themselves.

→ CABLES

Cables and accessories should be installed such that they are not exposed to mechanical damage, vibration and corrosive or chemical influences, for example due to solvents, and the effects of heat.

When this type of exposure is inevitable, protective measures must be taken to install or to select appropriate cables (using reinforced cables with shielding inside a seamless aluminum conduit, cables with a mineral insulation casing, a semi-rigid metal casing ...).

→ CABLE JOINTING

Whenever possible, complete cable lengths shall be installed in hazardous locations. Where this is impossible, a cable joint must be made to the mechanical, electrical or chemical constraints; it must also be enclosed in an enclosure in which the protection mode is appropriate for the Zone like junction boxes (AQR, EJB, GUB,...).

→ ADDITIONAL REQUIREMENTS FOR TYPE OF PROTECTION 'd' – FLAMEPROOF ENCLOSURES

Solid obstacles

When installing equipment, care shall be exercised to prevent the flameproof flange joint approaching nearer than the distance specified in table below to any solid obstacle which is not part of the equipment, such as steelwork, walls, weather guards, mounting brackets, pipes or other electrical equipment.

Minimum distance of obstruction from the flameproof flange joints related to the gas group of the hazardous area	
Gas group	Minimum distance (mm)
IIA	10
IIB	30
IIC	40

Protection of flameproof joints

Flameproof joints shall be protected against corrosion. Flameproof joints shall not be painted. (WARNING: Painting of the enclosure after complete assembly is permitted. The application of grease to the flameproof joint faces will reduce, but not eliminate, the quantity of paint penetrating the gap (Silicone based greases are often suitable for this purpose) – see § ELECTRICAL INSTALLATIONS INSPECTION AND MAINTENANCE).

Cable glands shall:

- be appropriate to the type of cable employed,
- maintain the type of protection,
- be in accordance with § CABLE GLANDS.

Thread engagement shall be at least five full threads (5 threads engaged for metric threaded, 3.5 threads engaged for NPT). Suitable grease may be used provided it is non setting, non-metallic and non-combustible and any earthing between the two is maintained.

Where the threaded entry or hole size is different to that of the cable gland, a flameproof threaded adapter complying with IEC 60079-1 shall be fitted which complies with thread engagement requirements detailed above.

Only one adapter is authorized.

Unused cable entries shall be sealed with a flameproof blanking element complying with IEC 60079-1.

Conduit systems

Conduit sealing devices shall be provided, either as part of the flameproof enclosure or immediately or as close as practical to the entry to the flameproof enclosure using a minimum number of fittings.

Conduit sealing devices, having parallel threads may be fitted with a sealing washer between the device and the flameproof enclosure providing that after the washer has been fitted, the applicable thread engagement is still achieved. Thread engagement shall be at least five full threads. (5 threads engaged for metric threaded, 3.5 threads engaged for NPT). Suitable grease may be used provided it is non-setting and any earthing between the two is maintained.

→ ADDITIONAL REQUIREMENTS FOR TYPE OF PROTECTION 'e' – INCREASED SAFETY

Enclosures containing bare live parts shall have a degree of ingress protection of at least IP54, whereas enclosures containing insulated parts shall only have a degree of ingress protection of at least IP44.

The connection of cables to increased safety equipment shall be effected by means of cable glands appropriate to the type of cable used. Cable entries shall also respect « e » protection mode and must incorporate an appropriate sealing element in order to obtain a minimum degree of protection at least equal to IP54 at the enclosure connection. Some terminals (e.g. slot types) may permit the entry of more than one conductor. Where more than one conductor is connected to the same terminal, care shall be taken to ensure that each conductor is adequately clamped.

Unless authorized by the documentation supplied with the equipment, two conductors with different diameters must not be connected to the same terminal, unless they have

firstly been fixed by means of a single compression sleeve. To avoid the risk of short-circuits between adjacent conductors in terminal blocks, the insulation of each conductor shall be maintained up to the metal of the terminal.

Combination of terminals and conductors in connection boxes and junction boxes: Care shall be taken to ensure that the heat dissipated within the enclosure does not result in temperatures in excess of the required equipment temperature class. This can be achieved by:

- a) following the guidance technical note given relating to the permissible number of terminals, the conductor size and the maximum current, or
- b) contacting us.

→ ADDITIONAL REQUIREMENTS FOR TYPES OF PROTECTION 'i' – INTRINSIC SAFETY AND 'nL' TYPE OF PROTECTION – ENERGY-LIMITED CIRCUITS

The aim of the installation rules for intrinsically safe circuits is to maintain separation from other circuits.

Requirements of EPL 'Gb' or 'Gc'

In installations to meet the requirements of EPL 'Gb', the intrinsically safe apparatus and the intrinsically safe parts of associated apparatus shall comply at least to level of protection 'ib'.

In installations to meet the requirements of EPL 'Gc', the intrinsically safe apparatus and the intrinsically safe parts of associated apparatus shall comply at least to level of protection 'ic'.

Simple apparatus need not be marked, but shall comply with the requirements of IEC 60079-0 and IEC 60079-11, in so far as intrinsic safety is dependent on them. No certification is required for a simple apparatus.

Associated apparatus should preferably be located outside the hazardous area or, if installed inside a hazardous area, shall be provided with another appropriate type of protection in like inside a EJB enclosures.

All apparatus forming part of an intrinsically safe system should, where reasonably practicable, be identifiable as being part of an intrinsically safe system. If sheaths or coverings are marked by a colour, the colour used for cables containing intrinsically safe circuits shall be light blue. Where intrinsically safe circuits have been identified by the use of light blue covered cable, then light blue covered cable shall not be used for other purposes in a manner or location which could lead to confusion or detract from the effectiveness of the identification of intrinsically safe circuits. If all intrinsically safe circuit cables or all cables of circuits which are not intrinsically safe are armoured,

metal sheathed or screened, then marking of intrinsically safe circuit cables is not required.

Alternative marking measures shall be taken inside control cabinets:

- combining the cores in a common light blue harness,
- labelling,
- clear arrangement and spatial separation.

The installation shall ensure that intrinsically safe circuit cables cannot be inadvertently connected to circuit cables which are not intrinsically safe. This may be achieved by:

- a) separating the different types of circuit cables, or
- b) placing the cables so as to protect against the risk of mechanical damage, or
- c) using cables which are armoured, metal sheathed or screened for specific types of circuits (e.g. all circuits which are not intrinsically safe are run in armoured cable or all intrinsically safe circuits are armoured).

Terminals for intrinsically safe circuits shall be separated from terminals of circuits which are not intrinsically safe:

- a) When separation is accomplished by distance, then the clearance between terminals shall be at least 50 mm,
- b) When separation is accomplished by use of an insulating partition or earthed metal partition, the partitions used shall extend to within 1,5 mm of the walls of the enclosure, or alternatively provide a minimum measurement of 50 mm between the terminals when taken in any direction around the partition.

The minimum clearances between the bare conducting parts of external conductors connected to terminals and earthed metal or other conducting parts shall be 3 mm.

The clearance between the bare conducting parts of field wiring terminals of separate intrinsically safe circuits shall be such that there is at least 6 mm between the bare conducting parts of connected external conductors.

The terminals of the intrinsically safe circuits shall be marked as such. This marking may be by the use of colour, in which case it shall be light blue.

Electrical installations inspection and maintenance

Standard EN/IEC 60079-17 covers factors directly related to the inspection and maintenance of electrical installations within hazardous areas only, where the hazard may be caused by flammable gases, vapours, mists, dusts, fibers or flyings. This standard stipulates that the inspection and maintenance of installations shall be carried out only by experienced personnel, whose training has included instruction on the various types of protection and installation practices, the requirements of this standard, the relevant national regulations/company rules applicable to the installation and on the general principles of area classification.

Three inspections are normally requested:

- initial inspection before plant or equipment is brought into service,
- regular inspections in time,
- inspection following any adjustment, maintenance, repair, reclamation, modification or replacement.

Frequency of inspection

The determination of the time interval between inspections shall be taken into account the process and the factors effecting the deterioration of equipment (susceptibility to corrosion, exposure to chemicals or solvents, likelihood of accumulation of dust or dirt, likelihood of water ingress, exposure to excessive ambient temperature, risk of mechanical damage, exposure to undue vibration, training and experience of personnel, likelihood of unauthorized modifications or adjustments and likelihood of inappropriate maintenance, for example that which is not in accordance with the manufacturer's recommendation).

But the interval between periodic inspections shall not exceed three years without seeking expert advice.

Degree of inspection

- Visual inspection: faults directly visible such as missing buttons or missing gasket, not well screw cable entries,...
- Close inspection: visual inspection and in addition detection faults (Close inspection does not normally require the enclosure to be opened, nor the equipment switched off).
- Detailed inspection: such as loose connections, detected after opening the enclosure.

→ SPECIFIC REQUIREMENTS

“Ex d” equipment:

It is preferable to obtain new parts from the manufacturer. Particular attention shall be paid to the correct assembly of flameproof enclosures after repair or overhaul, in order to ensure that the flameproof joints comply with the requirements of the standard. The flameproof enclosure are not gasketed thus they may be **protected by the use of grease, non-setting sealing compound or non-hardening tape** applied externally in accordance with IEC 60079-14. **The drilling of holes into a flameproof enclosure is forbidden.** No re-cement or repair light-transmitting parts shall be made and only complete replacement assemblies, as specified by the manufacturer, shall be used. **No modification affecting the explosion protection shall be carried out on parts of a flameproof enclosure.**

“Ex n” or “Ex e” equipment:

Care shall be taken when refurbishing terminations to maintain clearance and creepage distances. Any replacement

terminals, bushings or parts should be obtained from us or shall conform to the relevant certification documents only for the enclosure. It is preferable to obtain new parts from the manufacturer to guarantee the preservation of the degree of ingress protection and temperature classification as stipulated on the certification label.

All equipment:

For equipment with a gasket, replacements shall be of the same materials and dimensions as the original. Any proposed change of material shall be referred to the equipment manufacturer, user or certification authority. For luminaries: Light-transmitting or other parts made from plastics shall not be cleaned with solvents. Household detergents are recommended for this purpose. The maximum wattage of lamps specified shall not be exceeded. Care shall be taken when changing surface finish, paint, etc., as this may affect the surface temperature of the enclosure and thus the temperature classification. Care shall be taken to ensure that the specified type of protection and degree of ingress protection are maintained.

→ INSPECTION PROGRAM

Check that	Ex d	Ex e	Ex n	Ex t
EQUIPMENT				
Equipment is appropriate to the EPL/Zone requirements of the location	•	•	•	•
Apparatus group is correct	•	•	•	•
IP grade of equipment is appropriate to conductivity of dust				•
Equipment temperature class is correct	•	•	•	
Equipment maximum surface temperature is correct				•
Equipment circuit identification is correct	•	•	•	•
Equipment circuit identification is available		•	•	•
Enclosure, glass parts and glass-to-metal sealing gaskets and/or compounds are satisfactory	•	•	•	•
There are no unauthorized modifications	•	•	•	•
There are no visible unauthorized modifications	•	•	•	•
Bolts, cable entry devices (direct and indirect) and blanking elements are of the correct type and are complete and tight	•	•	•	•
Flange faces are clean and undamaged and gaskets, if any, are satisfactory	•			
Lamp rating, type and position are correct	•	•	•	•
Breathing and draining devices are satisfactory	•	•	•	
INSTALLATION				
The installation is such as to minimize the risk of dust accumulations				•
Type of cable is appropriate	•	•	•	•
There is no obvious damage to cables	•	•	•	•
Sealing of trunking, ducts, pipes and/or conduits is satisfactory	•	•	•	•
Stopping boxes and cable boxes are correctly filled	•	•	•	•
Earthing connections, including any supplementary earthing bonding connections are satisfactory (for example connections are tight and conductors are of sufficient cross-section)	•	•	•	•
Insulation resistance is satisfactory	•	•	•	•
Specific conditions of use (if applicable) are complied with	•	•	•	•
Obstructions adjacent to flameproof flanged joints are in accordance with IEC 60079-14	•			
Variable voltage/frequency installation in accordance with documentation	•	•	•	•
Cables not in use are correctly terminated		•	•	•
ENVIRONMENT				
Equipment is adequately protected against corrosion, weather, vibration and other adverse factors	•	•	•	•
No undue accumulation of dust and dirt	•	•	•	•
Electrical insulation is clean and dry	•	•	•

FLUORESCENT LIGHTING

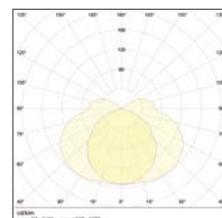

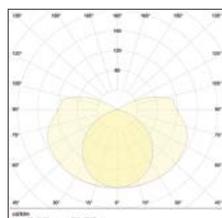

EVF-P.. Series - Zones 1, 2, 21 & 22 - End-cups in Copper-free aluminium

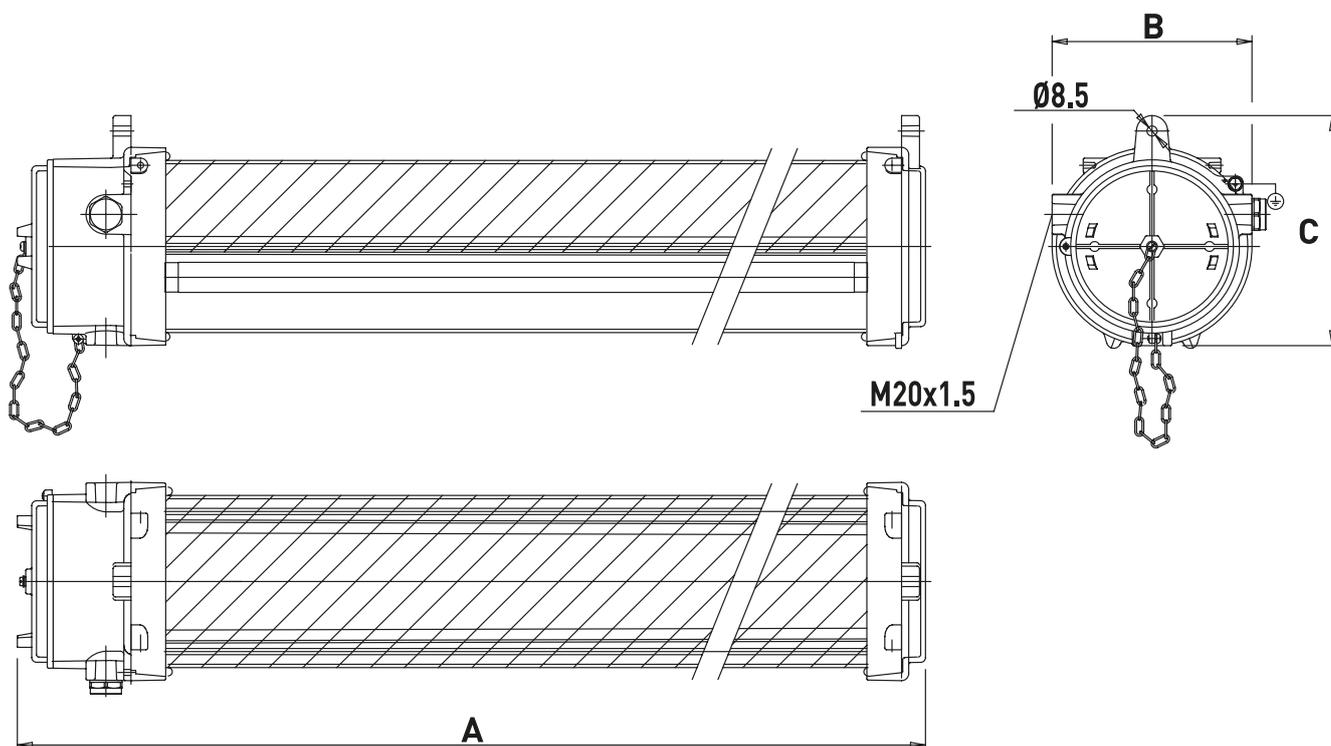

- Complete range of explosion-proof linear lighting fixtures available with single or double lamp and ideal for applications where a continuous row of lighting is needed to ensure a uniform illumination of production sites and machinery.
- Three layers-extrusion lamp housing:
 - Polycarbonate layer;
 - Top side reflecting layer which protects inner electrical and electronic apparatus from direct sun heating/radiation effect;
 - Filter layer which protects inner polycarbonate layer against UV radiation and related yellowing effect.
- Circular shape grants the best possible "CX" factor, therefore it is less affected by wind-dusts, pollution and dirty bunching.
- Possibility to apply an OFF-SHORE painting cycle suitable for marine environments.
- All lighting fixtures are supplied ready for LOOP IN-LOOP OUT facility with cable up to 4 sqmm.

FLUORESCENT LIGHTING

EVF-F.. Series - Zones 1, 2, 21 & 22, end-cups in GRP

- Complete range of explosion-proof linear lighting fixtures available with single or double lamp and ideal for applications where a continuous row of lighting is needed to ensure a uniform illumination of production sites and machinery.
- EVF-F lighting fixtures are manufactured with a high resistance cylindrical polycarbonate lamp housing and with end cups made of corrosion resistant and high mechanical resistance GRP.
- Threelayers-extrusion lamp housing: Polycarbonate layer; Top side reflecting layer which protects inner electrical and electronic apparatus from direct sun heating/radiation effect; Filter layer which protects inner polycarbonate layer against UV radiation and related yellowing effect.
- Circular shape grants the best possible "CX" factor, therefore it is less affected by wind dusts, no flat surfaces to avoid pollution and dirty bunching.
- All lighting fixtures are supplied ready for LOOP IN-LOOP OUT facility.

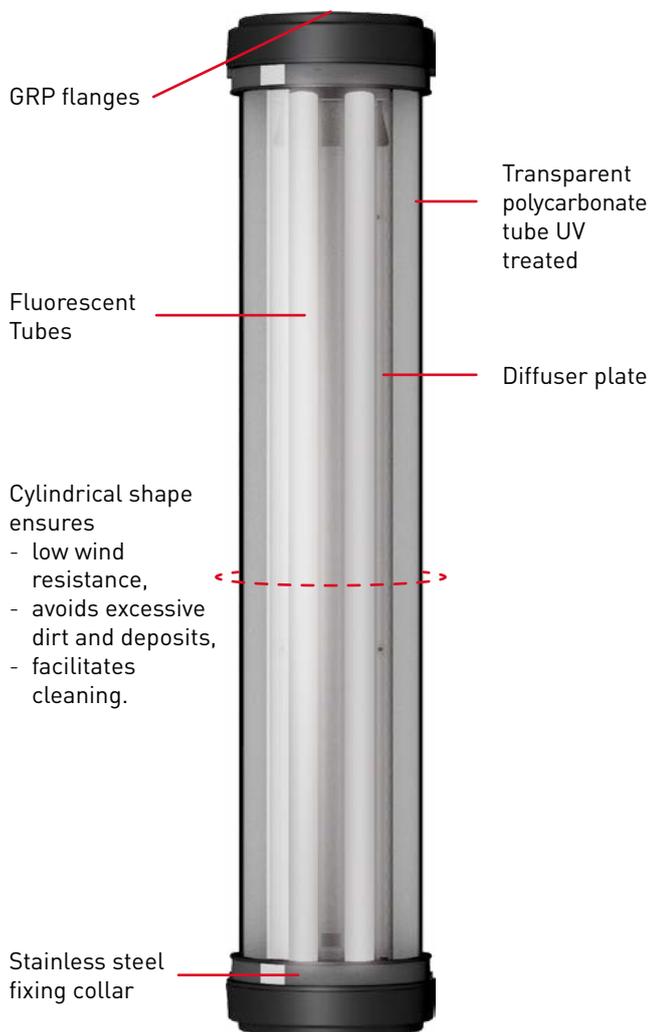

TECHNICAL FEATURES

Material	- Transparent polycarbonate envelope UV protected - GRP flanges - Stainless steel fastening collar	- White lacquered steel plate for increased reflectivity - Stainless steel screws	
IP, IK rating	IP66/IP 69K - IK 10		
Ambient temperature range	-20 °C to + 60 °C		
Approval	ATEX: LCIE 17 ATEX 3035 X - IECEx: IECEx LCIE 17.0064X EAC: RU C-IT.BH02.B.00616/20 (Not available for versions with Microswitch)		
Markings	II 2 G Ex db eb IIC T6 to T3 Gb (type of protection and temp. class depend on electrical equipment) II 2 D Ex tb IIIC T80 °C to T140 °C Db Standards compliance IEC/EN 60079-0, 60079-1, 60079-7, 60079-18 and 60079-31		
Zones	Gas and Dust: zones 1&2, 21 & 22		
Cable entries	PNCX connector for cable diameters 7 to 14 mm. On request: - 1 polyamide cable gland and 1 plug M20 for cable diameters 7 to 14 mm - 1 polyamide cable gland and 1 plug M25 for cable diameters 10 to 18 mm - Metal cable gland for armoured or unarmoured cable - Loop In/Loop Out - Through wiring - + 2 PNCX loop In/loop Out		
Lamps	EVF-F series lighting fixtures are suitable for two pins fluorescent lamps G13 socket Philips TL-D or equivalent (lamps excluded)		
Ballast	Possibility to have High frequency electronic ballast in compliance with IEC/EN 60079-18		
Electrical specifications			
Voltage	220-240 Vac (normal and emergency service)/198-278 Vdc (normal service)

Optional accessories	AISI316 Pole mounting kit/AISI316 Ceiling/Wall mounting kit/AISI316 Suspension mounting kit/3° bottom entry M20x1,5/AISI316 protection guard		
Photometric light curves	1 lamp	2 lamps	

The EVF-F luminaries have a very high mechanical resistance to shocks IK10 and corrosion while being particularly bright. Thus they meet all requirements of aggressive environments (humidity, corrosion, pollution) for industrial areas at risk of explosion.

EVF-F LUMINARIES

Two opening switches allow the light source and the battery to be switched off automatically when the luminaire flange is open.

MODULAR CONNEXION WAY

Through PNCX connector

- easier and quicker installation & maintenance
- easier loop in loop out, you can keep lighting throughout other lightings during maintenance operations.

**LOOP IN/LOOP OUT
1 SOCKET + 1 PLUG
PNCX VERSION**

With cable gland

- Metric threads M20 or M25
- Loop in loop out facility
- Available for armoured cables or unarmoured.

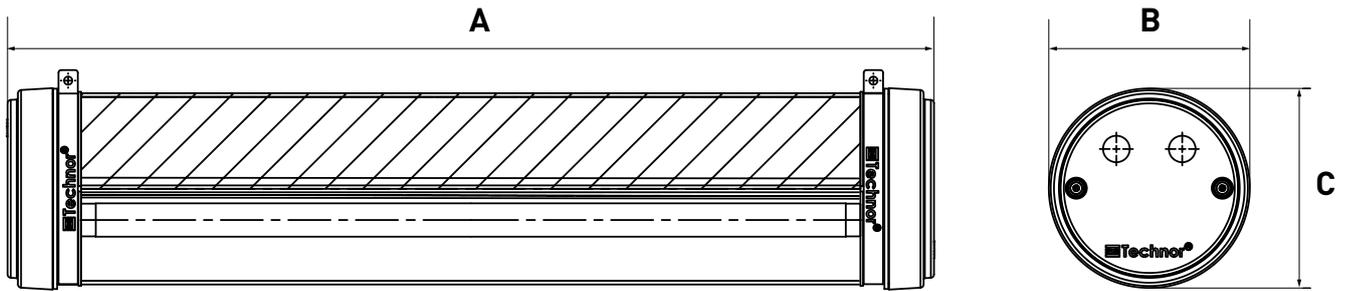

**LOOP IN/LOOP OUT
POLY GLAND VERSION**

**ARMOURED CABLE GLAND
VERSION**

FLUORESCENT LIGHTING

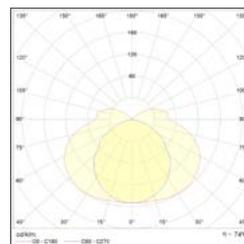

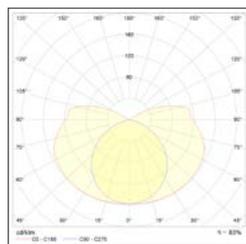

EVF2-PF/FF.. Series - Zone 2, 22 - Copper-free aluminum or GRP

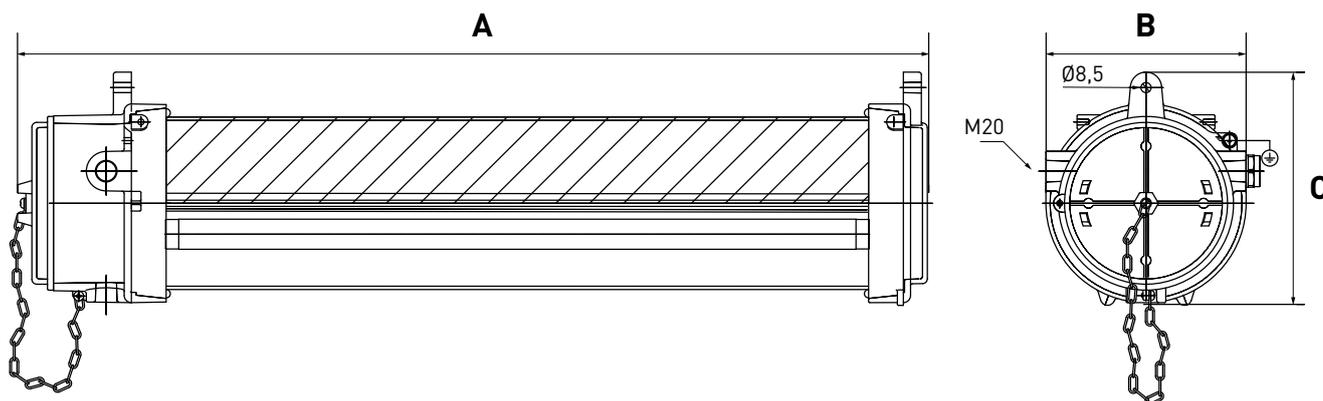

- Complete range of explosion-proof linear lighting fixtures available with single or double lamp and ideal for applications where a continuous row of lighting is needed to ensure a uniform illumination of production sites and machinery.
- End-cups made in copper-free aluminium or GRP.
- Three layers-extrusion lamp housing: Polycarbonate layer; Top side reflecting layer which protects inner electrical and electronic apparatus from direct sun heating/radiation effect; Filter layer which protects inner polycarbonate layer against UV radiation and related yellowing effect.
- Circular shape grants the best possible "CX" factor, therefore it is less affected by wind- dusts, pollution and dirty bunching.
- All lighting fixtures are supplied ready for LOOP IN-LOOP OUT facility with cable up to 4sqmm.

Note: EVF2-FF Series (normal service, emergency service - permanent & non-permanent) is available also for weatherproof application. Contact our sales dept. for more information.

FLUORESCENT LIGHTING

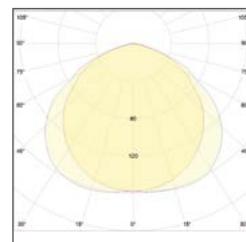

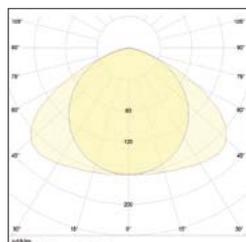

RMS-560.. Series - Zones 1, 2, 21 & 22 - Stainless steel AISI 304

- RMS.. series lighting fixtures are suitable for ON and OFF-SHORE applications
- Both body and glass frame are made of AISI304 stainless steel and manufactured from a single sheet of steel with no invasive mounting holes, to minimize the risk of water ingress through the housing
- Design has been studied to allow operator working with free hands and no need to support any part of lighting fixture. One person can take care of start-up or maintenance without any aid and assistance
- RMS-560 Series is available also with Microswitch in order to facilitate maintenance operations
- Due to inorganic materials like stainless steel and glass, RMS.. series lighting fixtures are 95% recyclable.

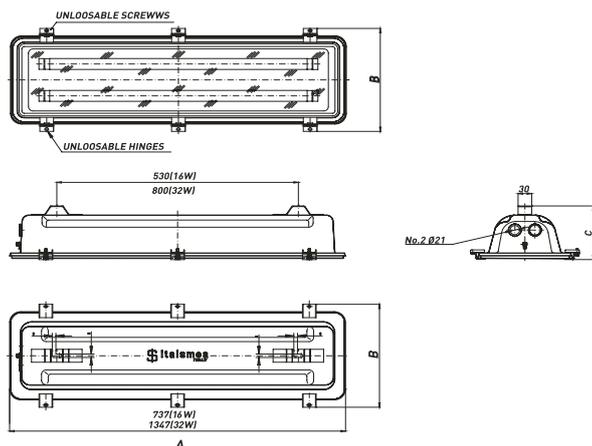

TECHNICAL FEATURES

Material	AISI304 stainless steel, 0,8mm thickness and transparent part in tempered glass	
IP rating	IP65	
Ambient temperature range	-20°C to +60°C	
Approvals	ATEX: 01ATEX0060 EAC: RU C-IT.BH02.B.00616/20 (Not available for versions with Microswitch)	
Marking	II 2 G Ex de IIC T6/T5/T4	T6 up to +40°C; T5 up to +55°C
	II 2 D Ex tD A21 T85°C/T100°C/T135°C	T85°C up to +40°C; T100°C up to +55°C
Gaskets	Special cross-section tightness gasket, silicon rubber made (closed cell), located in housing channel between body and window frame.	
Entries	Body complete of two 21mm Ø through holes (on one side) for cable entry, one complete of metallic plug with M20 locknut and gasket and the other one with temporary plastic plug to prevent dust ingress.	
Included accessories	AISI304 Stainless steel external hardware and screws	
Lamps	RMS series lighting fixtures are suitable for two pins fluorescent lamps G13 socket Philips TL-D or equivalent (lamps excluded)	
Ballast	High frequency electronic ballast conforming with EN 60079 – 1 and IEC 60079 – 1	
Rated operation voltage (UE)	220-240 V	
Frequency	50-60 Hz	
Power factor	> 0,98Cos Ø	
Optional accessories	Pole mounting kit/Ceiling mounting kit/Suspension mounting kit/Wall mounting kit 3°- 4° through holes opposite side	
Emergency unit:	18W:	36W:
Operating time	90' at 19% of flux	90' at 17% of flux
	120' at 12% of flux	120' at 10% of flux
Photometric light curves	1 lamp	2 lamps

FLUORESCENT LIGHTING

RMS-540.. Series - Safe area - Stainless steel AISI 304

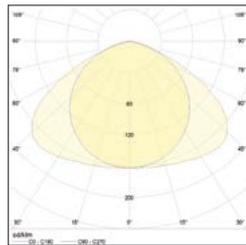

- RMS.. series lighting fixtures are suitable for ON and OFF-SHORE applications
- Both body and glass frame are made of AISI304 stainless steel and manufactured from a single sheet of steel with no invasive mounting holes, to minimize the risk of water ingress through the housing
- Design has been studied to allow operator working with free hands and no need to support any part of lighting fixture. One person can take care of start-up or maintenance without any aid and assistance
- Due to inorganic materials like stainless steel and glass, RMS.. series lighting fixtures are 95% recyclable.

TECHNICAL FEATURES

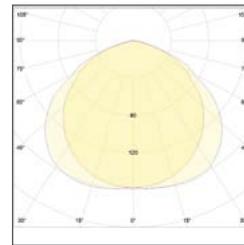

Material	AISI304 stainless steel, 0,8mm thickness and transparent part in tempered glass	
IP rating	IP65	
Ambient temperature range	-20°C to +60°C	
Standards	Compliance with Electromagnetic Compatibility (EMC) according to European Directive 2004/108/CE	
Gaskets	Special cross-section tightness gasket, silicon rubber made (closed cell), located in housing channel between body and window frame.	
Entries	Body complete of two 21mm Ø through holes (on one side) for cable entry, one complete of metallic plug with M20 locknut and gasket and the other one with temporary plastic plug to prevent dust ingress.	
Included accessories	AISI304 Stainless steel external hardware and screws	
Lamps	RMS series lighting fixtures are suitable for two pins fluorescent lamps G13 socket Philips TL-D or equivalent (lamps excluded)	
Ballast	Electromechanical ballast with starter and capacitor	
Rated operation voltage (UE)	230 V	
Frequency	50 Hz	
Optional accessories	Wiring with High frequency electronic ballast (220-240 V 50-60 Hz)/Pole mounting kit/Ceiling mounting kit/Suspension mounting kit/Wall mounting kit/3°- 4° through holes opposite side	
Emergency unit:	18W:	36W:
Operating time	90' at 19% of flux	90' at 17% of flux
	120' at 12% of flux	120' at 10% of flux
		180' at 11% of flux

FLUORESCENT LIGHTING

G2X Series - Zones 2 & 22

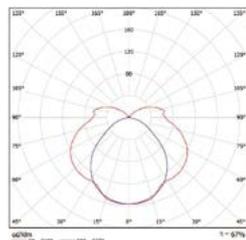

Luminaires G2X are suited for hazardous areas of industrial plants and space included in Zone 2 and 22.

The advantages of this luminaires series:

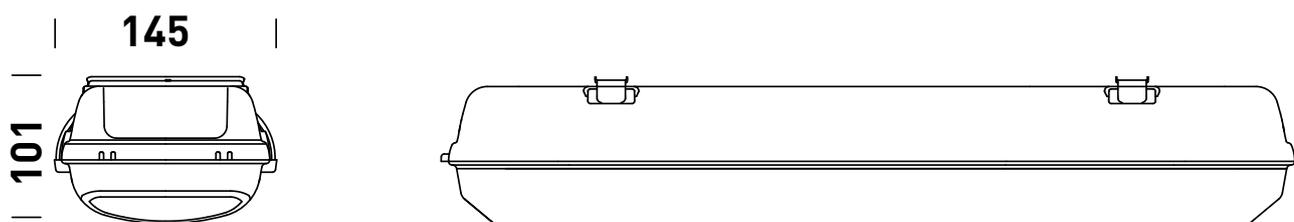

- Solid & compact structure
- Simple , easy and quick installation
- Possibility to suspend the lens hinge when replacing fluorescent lamps
- High resistance to corrosive industrial environment
- High luminous efficiency
- Quality ignition systems
- UV resistant
- Easy maintenance
- Transparent diffuser in PC with UV protection.

TECHNICAL FEATURES

Material	GRP + 2 gear tray holders in white lacquered steel plate Transparent diffuser in PC with UV protection and high impact resistance
IP/IK rating	IP66/IK08
Ambient temperature range	-20°C to +40°C
Approvals	ATEX: TNI 20ATEX0014 X - IECEx: OBAC18.0004X
Marking	II 3G Ex nA IIC T6 Gc II 3D Ex tc IIIC T85°C Dc IP66
Standards	EN 60079-0, EN 60079-15, EN 60079-31
Zones	Zone 2 , 22
Gaskets	Gasket in polyurethane
Entries	N° 1 passing entry M20
Included accessories	Fixing springs and closing clips in stainless steel
Lamps	T8 lamps , with power 18W , 36W, 58W T5, with power 14W
Ballast	Electronic
Rated operation voltage (UE)	230 V AC/DC (normal service); 230 V AC (emergency service); 110 V according to execution
Frequency	50-60Hz in AC
Accessories upon request	Polyamide ATEX cable gland M20x1,5
Maximum number of terminals	3x2,5mm ²
Colour	GRP housing in graphite (RAL 7035)
Options	Emergency kit 1h or 3h, Black GRP housing RAL9011, Yellow GRP housing RAL1003

CONVENTIONAL LIGHTING FIXTURES - WELLGLASS

EV.. Series - H.I.D./Fluorescent compact - Copper-free aluminium

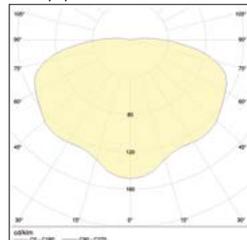

- EV.. series wellglass lighting fixtures are available in a wide range of wattage and are suitable for hazardous areas of industrial plants for lighting indoor and outdoor structures, for which narrow or wide beam lighting is needed.
- Copper-free aluminium body and tempered glass lamp compartment make this lighting fixtures suitable for applications where an excellent corrosion resistance is required.
- Available light sources: fluorescent compact and H.I.D: metal halide and high pressure sodium.
- Possibility to install reflectors able to drive light source.

TECHNICAL FEATURES

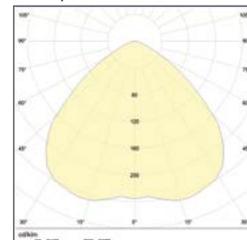

Material	Copper-free aluminium	
IP rating	IP66

CONVENTIONAL LIGHTING FIXTURES - FLOODLIGHTS

FL.. Series - Copper free aluminium or Stainless steel AISI 316 L

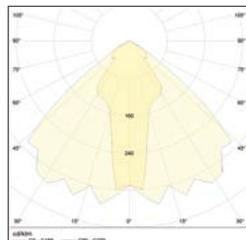

- Available in a wide range of wattage, FL-Series can host high pressure sodium or metal halide lamps and can be equipped with symmetrical narrow or wide beam reflector to satisfy different application requirements
- FL- Floodlights are ideally suited for large-scale areas and street, sidewalk or perimeter illumination
- Possibility to apply an OFF-SHORE painting cycle which increases the surface protection of floodlights making them suitable also for marine environments
- Manufactured in copper-free aluminium or AISI316L stainless steel, FL.. Series have an excellent corrosion resistance
- To simplify installation and maintenance, floodlights are supplied complete with an integral Ex e connection box and AISI304 stainless steel universal mounting bracket.

TECHNICAL FEATURES

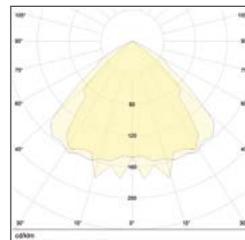

Material	Copper-free aluminium Stainless steel AISI 316 L (ordering codes upon request)
IP rating	IP66
Ambient temperature range	-50°C to + 55°C
Approvals	ATEX: 00ATEX0023X - IECEx: INE 16.0038X EAC: RU C-IT.BH02.B.00616/20 – ECAS 21-04-10283 E21-04-021857

LED LIGHTING

EVde-PR../LED Series – Wellglass - Copper-free aluminium

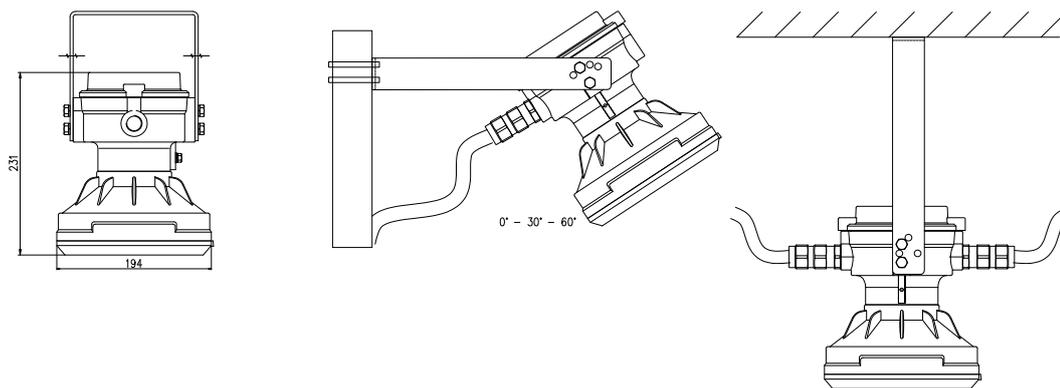

- Explosion-proof wellglass lighting fixture made in copper-free aluminium and tempered glass; provided with AISI304 or AISI316L stainless steel hardware and screws;
- LED lifetime-saving technology and overvoltage protection system;
- High resistance to corrosion and designed for the harshest temperatures.

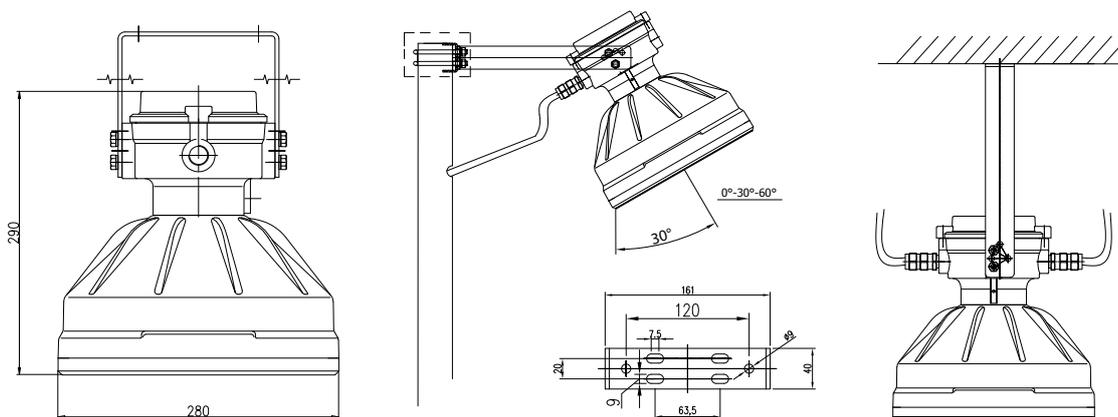

TECHNICAL FEATURES

Material	Copper-free aluminium and tempered glass
IP rating	IP66
Ambient temperature range	-60°C to +60°C (Operating at 60°C, provided that the luminaire is switched on above 40°C)
Approvals	ATEX: INERIS 01ATEX0019X - IECEx: INE 15.0031X EAC: RU C-IT.BH02.B.00616/20 – ECAS: 21-04-10282 E21-04-021858

LED LIGHTING

EVA Series - Hand lamp – Copper-free aluminium

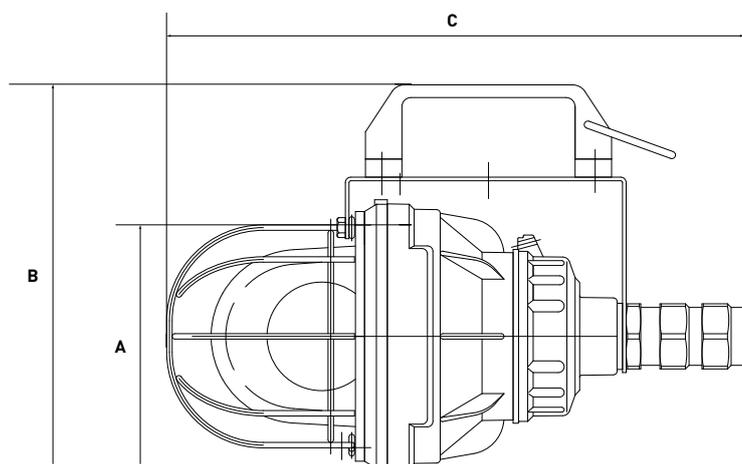

- Portable lights provided with insulated handle to assure safety working conditions for operators.
- Made of copper-free aluminium and suitable for LED lamp.
- Possibility to install a protection guard.

TECHNICAL FEATURES

Material	Copper-free aluminium
IP rating	IP66
Ambient temperature range	-52°C to +60°C
Approvals	ATEX 01ATEX0019X - IECEx INE 15.0031X TR CU RA RU BH02 616 - ECAS 21-04-10282 E21-04-021858
Marking	II 2 G Ex db IIC T3 Gb Ex tb IIIC T200°C Db IP66
Gaskets	O-ring made of Nitrile Rubber (NBR)
Surface treatment	Polyurethane painting cycle - Blue RAL5014 (other colours on request)
Entries	N° 1 entry M25x1,5 complete with brass nickel chrome plated cable gland PAP type
Included accessories	AISI304 Stainless steel external hardware and screws
Lamps	Included
Rated operation voltage (UE)	230 V (standard) 220 V, 240 V (upon request)
Frequency	50/60 Hz
Optional accessories	Protection guard Brass nickel chrome plated cable gland PAP type complete with set of inner and outer seals
Photometric curve

LED LIGHTING

FL1.. Series - Zones 1, 2, 21, 22 – Copper-free aluminium

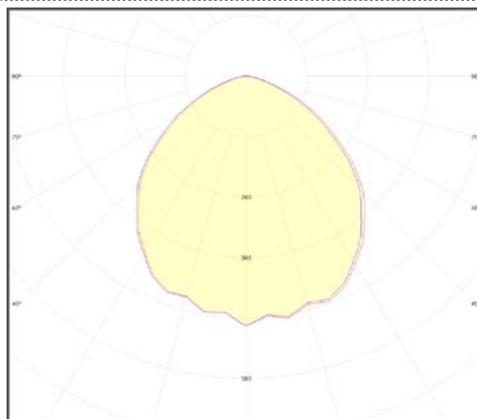

- LED explosion-proof floodlights ideal for large-scale areas and street lighting, sidewalk-lighting or perimeter illumination
- Manufactured in copper-free aluminium and tempered glass, FL1 Series have an excellent corrosion resistance
- Provided with adjustable bracket in AISI316L stainless steel for wall/ceiling and pole-mounting
- Modular design: up to 4 units
- Very high lumen output: up to 32.000 lm.

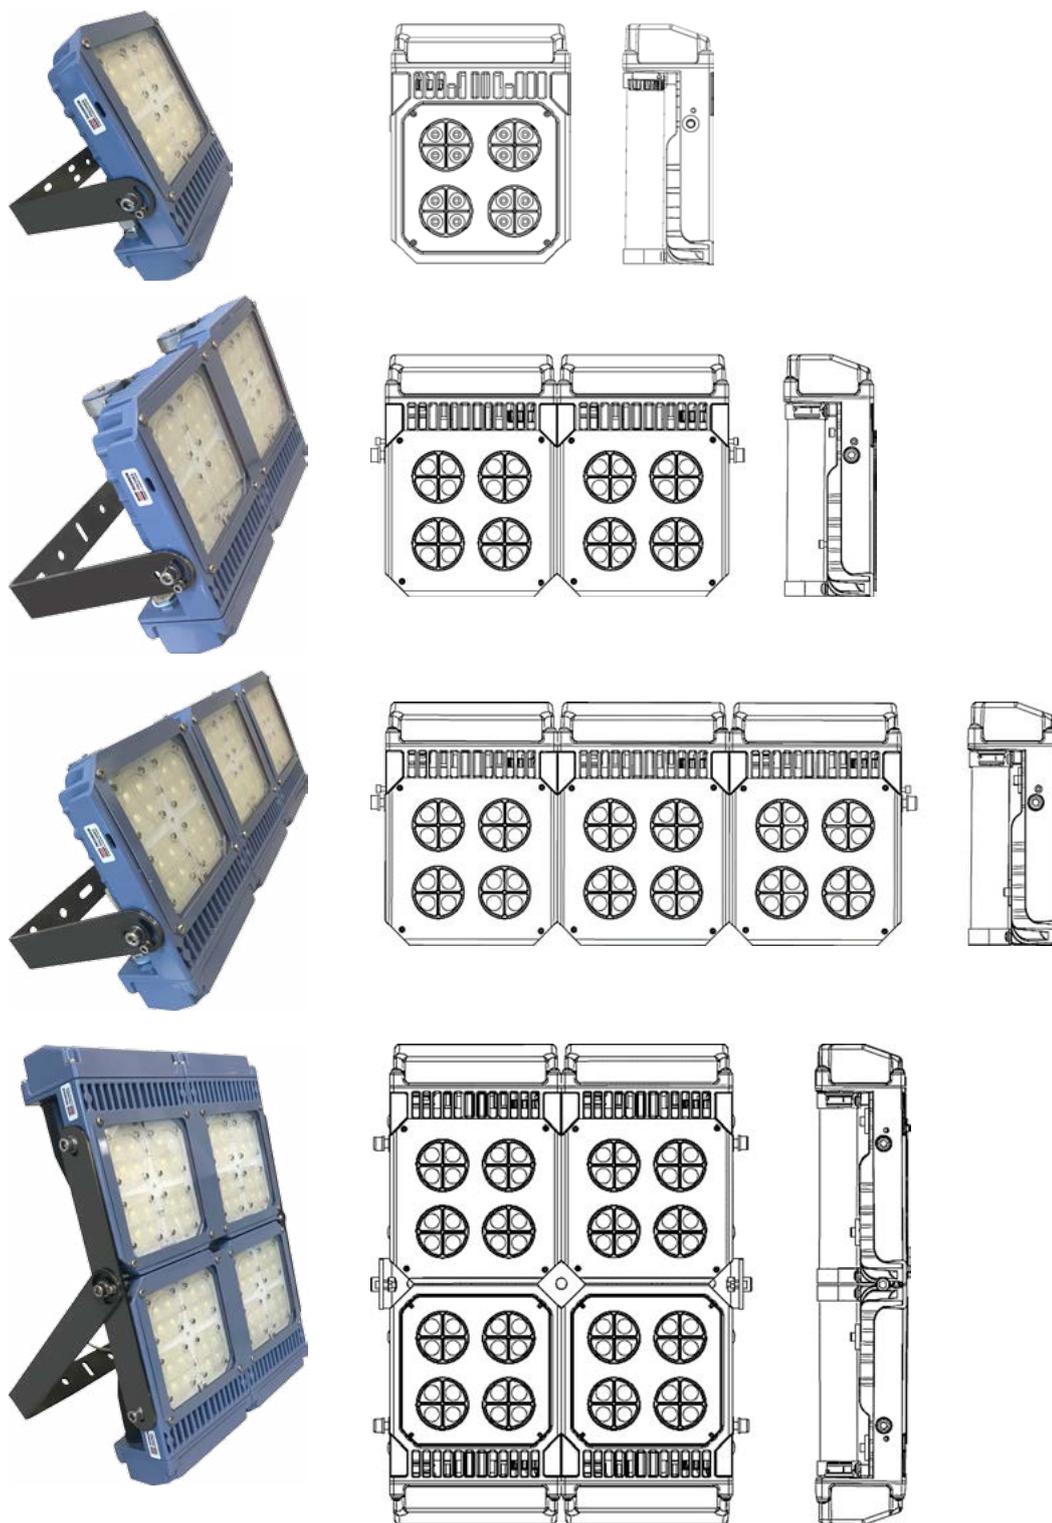

TECHNICAL FEATURES

Material	Body: copper-free aluminium
IP rating	IP66

LED LIGHTING

EVF-P* TL* LED.. Series - Zones 1, 2, 21, 22 - Copper-free aluminium

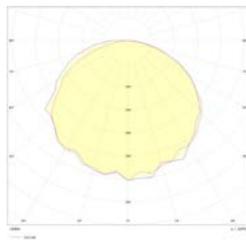

- Complete range of explosion-proof linear lighting fixtures available with strip led up to 4 led and ideal for applications where a continuous row of lighting is needed to ensure a uniform illumination of production sites and machinery.
- Threelayers-extrusion lamp housing: Polycarbonate layer; Top side reflecting layer which protects inner electrical and electronic apparatus from direct sun heating/radiation effect; Filter layer which protects inner polycarbonate layer against UV radiation and related yellowing effect.
- Circular shape grants the best possible "CX" factor, therefore it is less affected by wind- dusts, pollution and dirty bunching.
- Possibility to apply an OFF-SHOREpainting cycle suitable for marine environments.
- All lighting fixtures are supplied ready for LOOP IN-LOOP OUT facility with cable up to 4 sqmm.

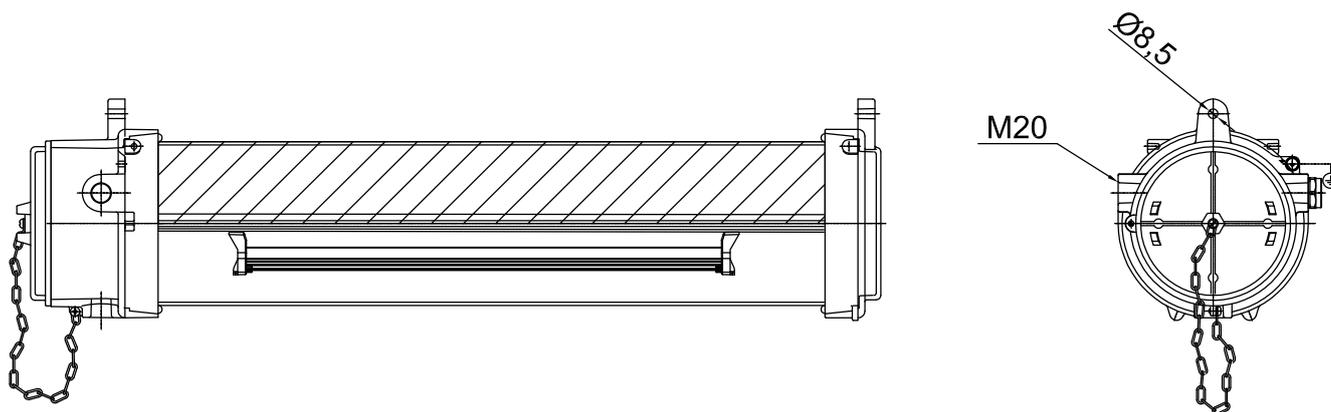

TECHNICAL FEATURES

Material	End cups in aluminium with low content of copper/Light housing in polycarbonate
IP/IK rating	IP66 according to EN 60529 IK10 according to EN 62262:2002

Photometric curves	

The EVF-L luminaries have a very high mechanical resistance to shocks IK10 and corrosion while being particularly bright. Thus they meet all requirements of aggressive environments (humidity, corrosion, pollution) for industrial areas at risk of explosion.

EVF-L LUMINARIES

Cylindrical shape ensures

- low wind resistance,
- avoids excessive dirt and deposits,
- facilitates cleaning.

Stainless steel fixing collar

Two opening switches allow the light source and the battery to be switched off automatically when the luminaire flange is open.

MODULAR CONNEXION WAY

Through PNCX connector

- easier and quicker installation & maintenance
- easier loop in loop out, you can keep lighting throughout other lightings during maintenance operations.

**LOOP IN/LOOP OUT
1 SOCKET + 1 PLUG
PNCX VERSION**

With cable gland

- Metric threads M20 or M25
- Loop in loop out facility
- Available for armoured cables or unarmoured.

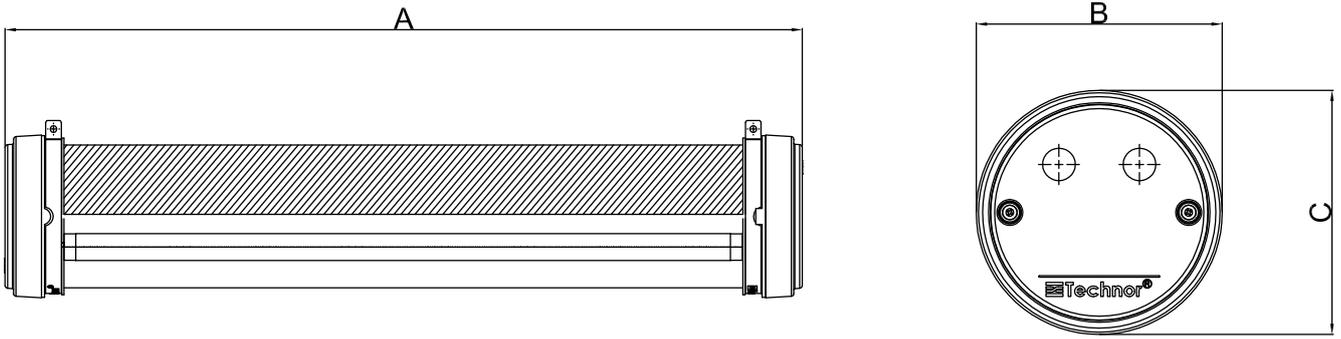

**LOOP IN/LOOP OUT

LED LIGHTING

RMS-560 LED.. Series - Zones 1, 2, 21 & 22 - Stainless steel AISI 304

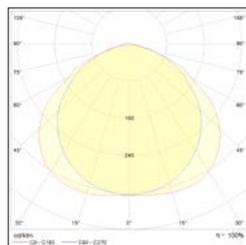

- RMS.. series lighting fixtures are ideally suited for ON and OFF-SHORE applications and all kinds of industries where there is an high level of corrosion.
- Both body and glass frame are made of AISI304 stainless steel and manufactured from a single sheet of steel with no invasive mounting holes, to minimize the risk of water ingress through the housing.
- Design has been studied to allow operator working with free hands and no need to support any part of lighting fixture. One person can take care of start-up or maintenance without any aid and assistance.
- Due to inorganic materials like stainless steel and glass, RMS.. series lighting fixtures are 95% recyclable.

TECHNICAL FEATURES

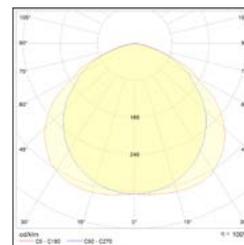

Material	AISI304 stainless steel, 0,8mm thickness and transparent part in tempered glass
IP rating	IP65
Ambient temperature range	-20°C to + 50°C (Normal & Standard Emergency models) -20°C to + 40°C (Emergency models with charging status pilot light)
Approvals	ATEX: TÜV CY 17 ATEX 0205847 X EAC: RU C-IT.BH02.B.00616/20 (Not available for versions with Microswitch)
Marking	II 2 GD Ex eb db mb op is IIC T4 Gb Ex tb IIIC T135°C Db IP65
Gaskets	Special cross-section tightness gasket, silicon rubber made (closed cell), located in housing channel between body and window frame.
Entries	Body complete of two 21mm Ø through holes (on one side) for cable entry, one complete of metallic plug with M20 locknut and gasket and the other one with temporary plastic plug to prevent dust ingress.
Included accessories	AISI304 Stainless steel external hardware and screws
Lamps	Extended long life new LED technology with CRI > 85
Ballast	Electronic
Rated operation voltage (UE)	220-240Vac (normal and emergency service) 198-278Vdc (normal service)
Frequency	50-60 Hz
Power factor	> 0,95
Optional accessories	Pole mounting kit; Ceiling/Wall mounting kit; Suspension mounting kit; 3°- 4° entries on opposite side

Note: EVF2-FL Series is available also for weatherproof application. Contact our sales dept. for more information.

LED LIGHTING

TL2.. Series – LED lighting fixture – Copper-free aluminium

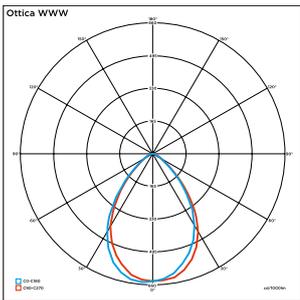

- Complete range of lighting fixtures manufactured of copper-free aluminium and tempered glass; provided with AISI316L stainless steel hardware and screws.
- TL2 Series can mount different lens over LEDs to be suitable for many applications: floodlights, wellglass lighting fixtures, linear lighting fixtures.
- Increased LED lifetime: up to 100.000 hours of maintenance free operation, with a luminous flux that reaches up to 50.220 lm.
- Provided with overvoltage protection system, flicker free and dimmable.

TECHNICAL FEATURES

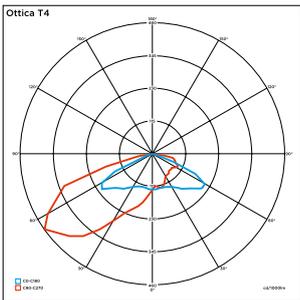

Material	Copper-free aluminium and tempered glass
IP rating	IP66
Ambient temperature range	-40 °C to + 55 °C
Approval	FIDI 20ATEX0010X/FIDI 20ATEX0011X FIDI 20.0002X/RU C-IT.BH02.B.00616/20
Markings	II 2 D Ex tb IIIA T80°C Db II 3 G Ex ec IIC T3 Gc II 3 D Ex tc IIIB T80°C Dc Standards compliance IEC/EN 60079-0, IEC/EN 60079-7/A1, and EN 60079-31
Zones	Gas Zone: 2 Dust Zone: 21, 22
Rated voltage	220-240 VAC (+-10%)
Frequency	50-60 Hz
Flux	Up to 50.220 lm
Colour rendering index	70 CRI
Colour temperature	4.000/5.700 K
Power factor	cos φ ≥ 0,95
Surge protection	6 kV
Driver	Electronic - Equipped with thermal guard protection to prevent overtemperature
LED Lifetime (L90B10) Ta +25°C	> 100.000 h – L90 according to IES LM-80-08
Hardware and screws	AISI316 stainless steel
Coating	Epoxy - Blue colour (RAL5014) - Other colours upon request
Entries	n°4 entries Ø 20mm
Through wiring	Loop-in/Loop-out
Plug	n° 1 x M20 brass nickel chromed (gasket + M20 lock nut included)
Accessories on request	AISI316L stainless steel pole mounting kit 2"; Brass Nicr/AISI316L stainless steel cable glands for armoured/unarmoured cable (seal gasket + set of seal + M20 lock nut included); Shroud for cable gland; Brass nickel chromed plug M20 (gasket + M20 lock nut included)

Photometric curves - TL2 Series

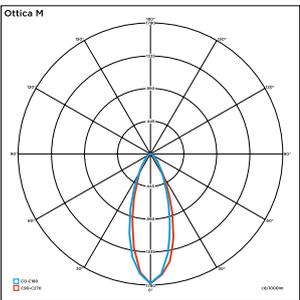

The same chassis with different lens over LEDs will make this lighting fixture suitable for many different applications: floodlight, streetlight, linear and wellglass lighting fixtures.

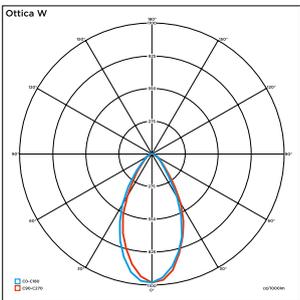

Wellglass/Linear

LED LIGHTING

G2X LED Series - Zones 2 & 22

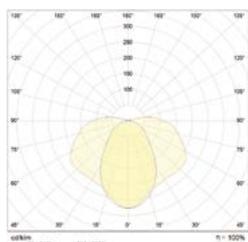

Luminaires G2X LED are suited for hazardous areas of industrial plants and space included in Zone 2 and 22.

The advantages of this luminaires series:

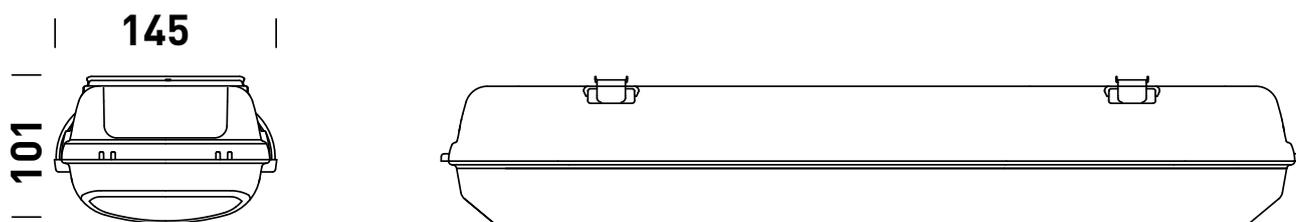

- Simple, easy and quick installation
- High resistance to corrosive industrial environment
- High luminous efficiency
- Quality ignition systems
- UV resistant.
- Easy maintenance
- A high-quality LED source with high colour rendering

TECHNICAL FEATURES

Material	GRP + 2 gear tray holders in white lacquered steel plate Transparent diffuser in PC with UV protection
IP rating	IP66
Ambient temperature range	From -20°C TO +40°C
Approvals	ATEX: TNI 20ATEX0014 X - IECEx: OBAC18.0004X
Marking	II 3 G Ex nA IIC T6 Gc II 3 D Ex tc IIIC T85°C Dc IP66
Standards	EN 60079-0, EN 60079-15, EN 60079-31
Zones	Zone 2 , 22
Gaskets	Gasket in polyurethane (to obtain IP66 rating)
Entries	N° 1 passing entry M20
Included accessories	Fixing springs and closing clips in stainless steel
Lamps	LED lamps
Rated operation voltage (UE)	230 V AC/DC (normal service); 230 V AC (emergency service); 110 V according to execution
Frequency	50-60Hz in AC
Accessories upon request	Polyamide ATEX cable gland M20x1,5
Maximum number of terminals	3x2,5mm ²
Colour	GRP housing in graphite (RAL 7035)
Options	Emergency kit 3h, Black GRP housing RAL9011, Yellow GRP housing RAL1003
Photometric curve

EFXE Series - Stainless steel AISI 316 L

Control stations EFXE Series, made of stainless steel AISI 316 L, are manufactured by using enclosures SB Series.

They are designed to meet the requirements for use ON and OFF-SHORE, in petrochemical and marine applications and for any other industry where an explosive atmosphere may be present.

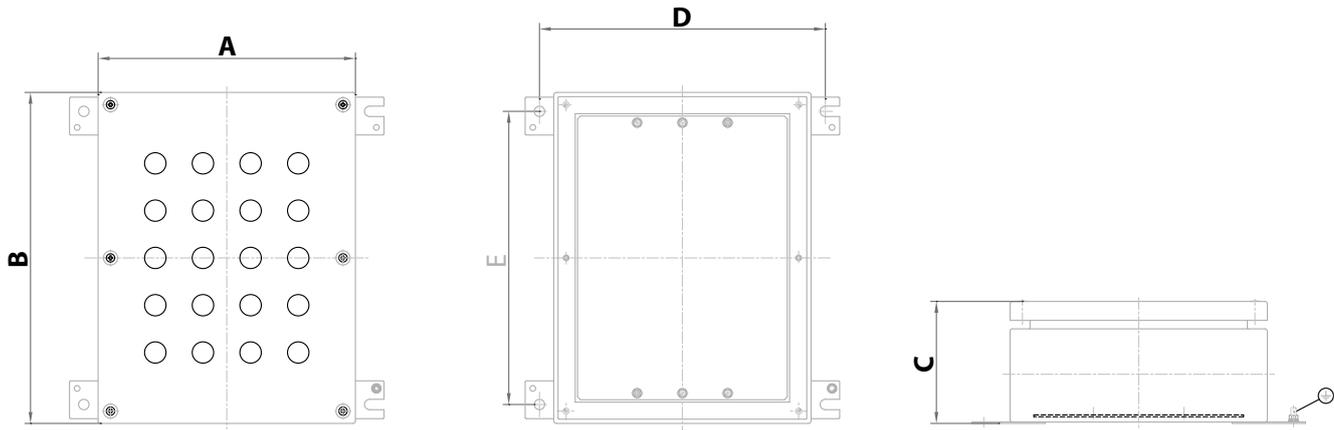

They can be equipped with following Ex de certified components:

- Standard and emergency push buttons,
- Rotating switches,
- Signalling lamps,
- Measurement instruments.

TECHNICAL FEATURES

Material	Stainless steel AISI-316L
IP rating	IP65*/IP66 *Depending on the type of components installed on
Ambient temperature range	-50°C to +95°C
Approvals	FIDI21ATEX0090X IECEX FIDI21.0015X EAC RUC-IT.BH02.B.00593/20

INCREASED SAFETY

EFE Series - GRP

Control stations EFE Series, made of GRP, are manufactured by using enclosure AQ../AR.. Series.

They are designed to meet the requirements for use ON and OFF-SHORE, in petrochemical and marine applications and for any other industry where an explosive atmosphere may be present.

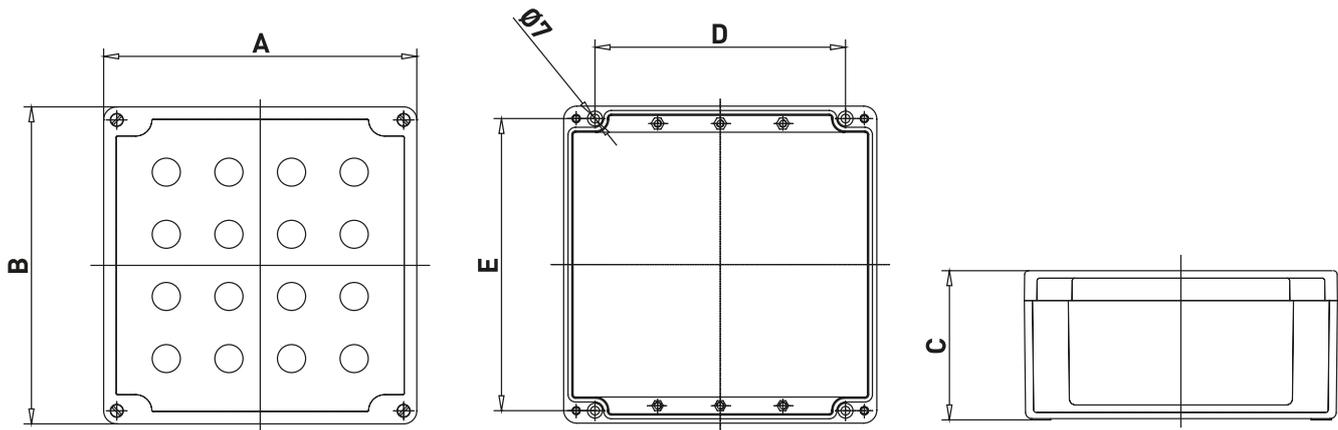

They can be equipped with following certified components:

- Standard and emergency push buttons;
- Rotating switches;
- Signalling lamps;
- Measurement instruments.

TECHNICAL FEATURES

Material	GRP (Glassfiber reinforced polyester)
IP rating	IP65/IP66
Ambient temperature range	-50°C to +95°C
Approvals	Full Conformity Certificate: FIDI 21ATEX 0090X IECEX FIDI21.0015X EAC RUC-IT.BH02.B.00593/20
Marking	II 1 G Ex ia IIC/IIB T6/T5/T4 Ga II 2 GD Ex db eb ia/ib mb* IIC/IIB T6/T5/T4 Gb and/or Ex tb IIIC T85°C/T100°C/T135°C Db *Associated equipment protection depending on the components actually mounted
Standard certificate label	Made by self adhesive UV and corrosion resistant polyester, approved by certified Laboratory.
Optional accessories	Hinges Drain/breather valve Traffolyte/Stainless steel certificate label Internal mounting plate Earth continuity plates Passing through earth bolt

INCREASED SAFETY - TI SERIES

TI Series* offers a large selection of certified components suitable for Ex e enclosures:

- Contacts & standard and emergency push buttons (up to 16A);
- Signalling lamps with or without push button;
- Measurement instruments: ammeters, voltmeters, millimeters;
- Circuit breaker, contactors, miniature relays, busbars;
- Load isolation switches with handle;
- Extended operating temperature: from -55°C up to +90°C.

TI SERIES – COMPLETE RANGE OF ACCESSORIES

*TI Series refers to the brand name of our range of accessories

INCREASED SAFETY - HARMATEX SERIES

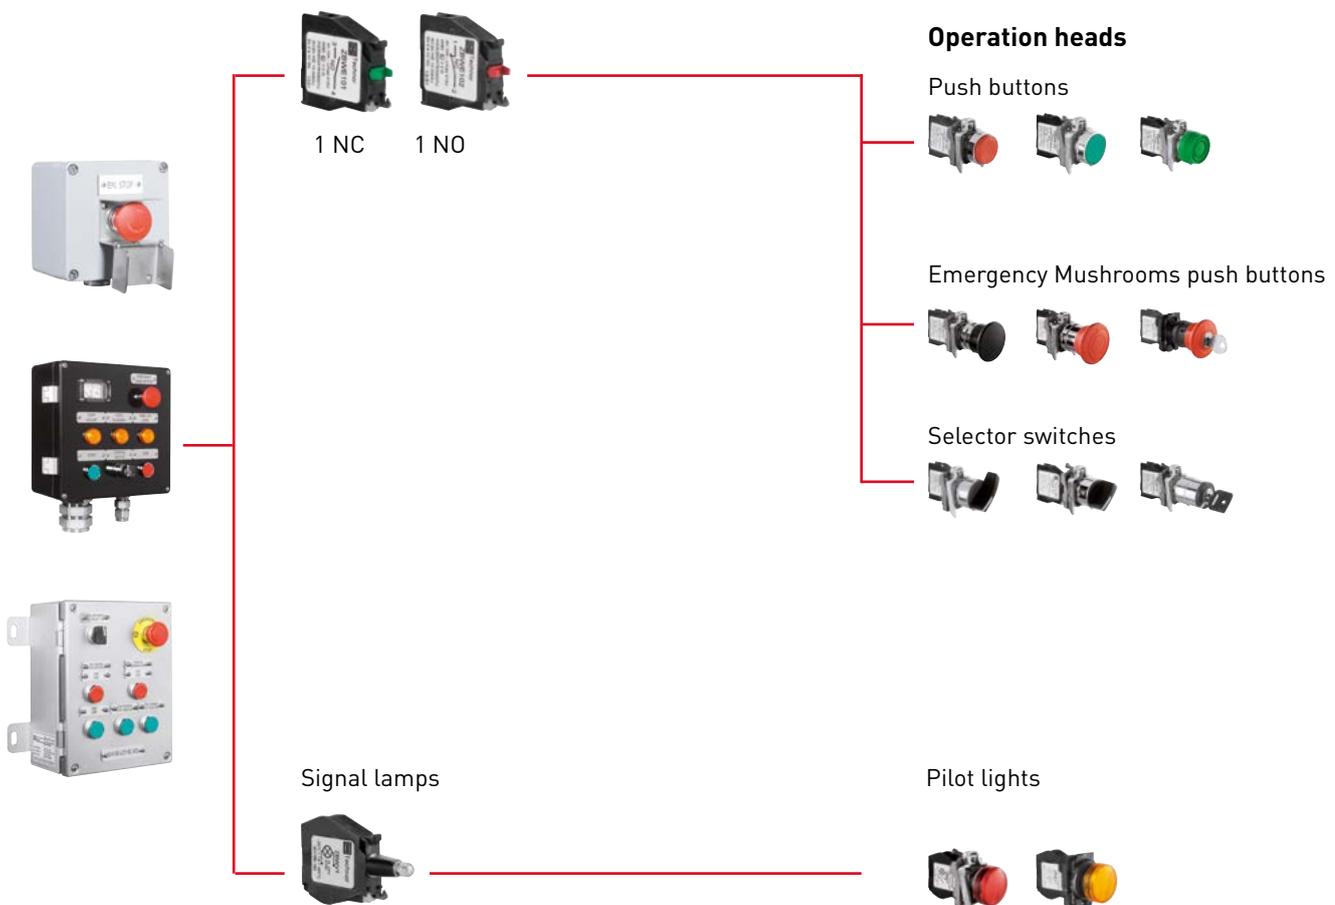

The Harmatex Series offers a large selection of contacts & operation heads suitable for Ex d enclosures:

- Momentary and push-push actuation modes;
- Standard and emergency push buttons;
- Selector switches;
- Pilot lights.

Unrivalled flexibility thanks to its modular design:

- Up to 6 contacts per operation head;
- Operating temperature: from -20°C up to +75°C

HARMATEX SERIES – CONTACTS & OPERATION HEADS

FLAMEPROOF CP../EFDCN.. Series - Copper-free aluminium

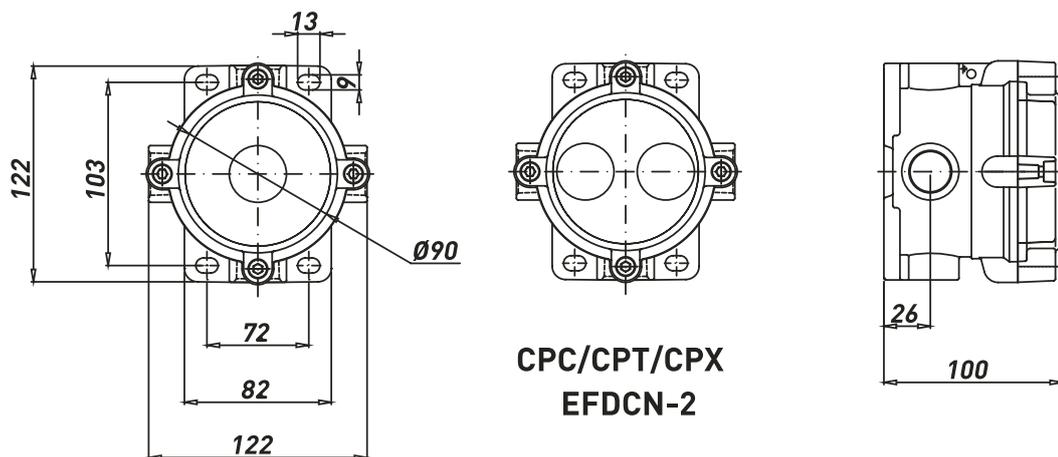

- CP../EFDCN.. Series is suitable for indoor and outdoor application and are used as push-button stations, switches, motor control stations...;
- The enclosures are made of copper-free aluminium and complete with threaded hubs suitable for cable glands or conduit, connection does not affect the internal void, which remains available for terminals wiring;
- The enclosures offer an Ex d IIC mode of protection and can be equipped with different components (up to 4) such as: push buttons, selector switches, potentiometers, signal lamps, rotary handles, ammeters, voltmeters...;
- This series is tailor made according to customer specifications in terms of quantity and type of operators. Our technical department will select the most suitable solution within the limits allowed by the certificate.

TECHNICAL FEATURES

Material	Copper-free aluminium
IP rating	IP66
Ambient temperature range	-50°C to +60°C (ATEX) -60°C to +60°C (IECEX)
Approvals	ATEX: 03ATEX0009 IECEX: BKI 15.0002 EAC: RU C-IT.BH02.B.00588/20
Marking	II 2 GD Ex d IIC T[*] Gb Ex t IIIC T[*] Db IP66 * T6/T85°C, T5/T100°C, T4/T135°C
Surface treatment	Polyurethane painting cycle - Blue RAL5014 (other colour available upon request)
Thread	Metric pitch 1.5 ANSI B1.20.1 NPT
Standard certificate label	Made by self adhesive UV and corrosion resistant polyester, approved by certified Laboratory.
Optional accessories	Internal anticondensate painting Traffolyte/Stainless steel certificate label Hot deep galvanized steel or Stainless Steel AISI316 stand/canopy.

*CP../EFDCN Series are supplied ATEX/TR-CU certified. For IECEx certificate, ask to our Sales Dept.

*CP../EFDCN Series are supplied painted. Standard painting cycle: C4 - Colour: Blue RAL5014 (Other colours available upon request)

**Codes refer to drilled enclosures without operators & components. To be ordered separately, refer to "Spare & Accessories" section.

For different customized configurations, ask to our Sales. Dept.

FLAMEPROOF CP../EFSRC.. Series - Copper-free aluminium

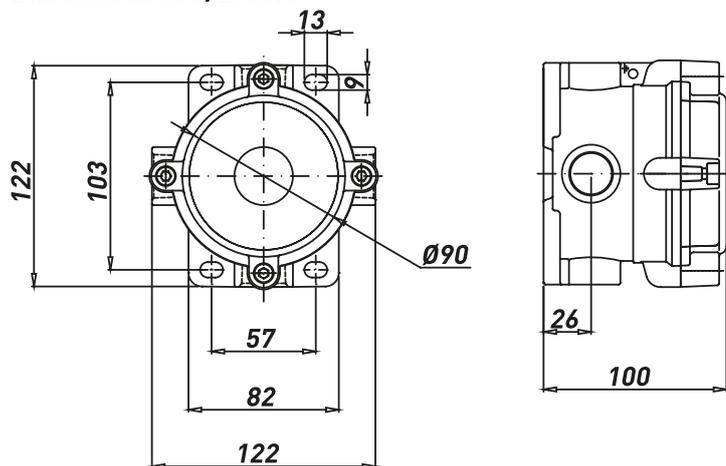

- CP../EFSRC.. Series is suitable for indoor and outdoor application and are used as push-button stations, switches, motor control stations...;
- The enclosures are made of copper-free aluminium and complete with threaded hubs suitable for cable glands or conduit, connection does not affect the internal void, which remains available for terminals wiring;
- The enclosures offer an Ex d IIC mode of protection and can be equipped with different components such as: step, change-over, selector switches...
- This series is tailor made according to customer specifications in terms of quantity and type of operators. Our technical department will select the most suitable solution within the limits allowed by the certificate.

TECHNICAL FEATURES

Material	Copper-free aluminium
IP rating	IP66
Ambient temperature range	-50°C to +60°C (ATEX) -60°C to +60°C (IECEX)
Approvals	ATEX: 03ATEX0009 IECEX: BKI 15.0002 EAC: RU C-IT.BH02.B.00588/20
Marking	II 2 GD Ex d IIC T[*] Gb Ex t IIIC T[*] Db IP66 * T6/T85°C, T5/T100°C, T4/T135°C
Surface treatment	Polyurethane painting cycle - Blue RAL5014 (other colour available upon request)
Thread	Metric pitch 1.5, ANSI B1.20.1 NPT
Standard certificate label	Made by self adhesive UV and corrosion resistant polyester, approved by certified Laboratory.
Optional accessories	Internal anticondensate painting Traffolyte/Stainless steel certificate label Hot deep galvanized steel or Stainless Steel AISI316 stand/canopy.

FLAMEPROOF - PL../PSRC.. SERIES

Ex d components are available in a wide range of operators/pilot lights PL.. Series and selectors PSRC.. Series allowing numerous combinations with our CP../CPS.. EFDCN/EFSRC series.

PL.. Series includes standard push buttons, emergency push buttons, key selector switches, pilot lights; mechanical operators allow the assembling of a maximum of four contacts.

PSRC.. Series includes on-load switches, change over switches, step switches and selector customized upon request on the base of customer specification.

AQ../AR.. Series - Copper free aluminium low thickness

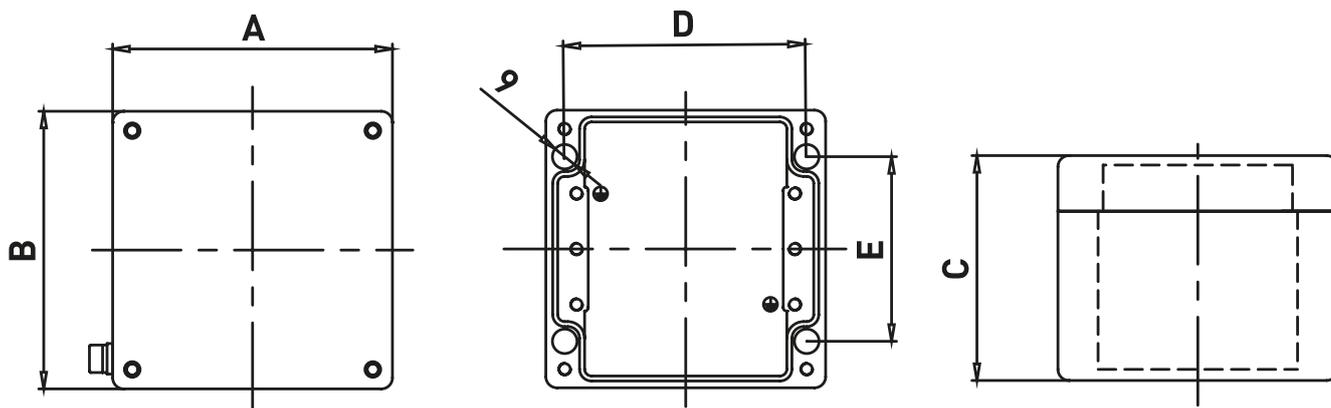

- AQ../AR.. Series enclosures are ideally suited for chemical and petrochemical environments;
- Made of copper-free aluminium, AQ../AR.. enclosures guaranteed high resistance to sea water corrosion and can withstand the harshest temperatures;
- Used to house Ex e and Ex i terminals. Maximum number of terminals changes according to: terminals section, enclosure operating temperature and required temperature class.

TECHNICAL FEATURES

Material	Copper-free aluminium	
IP rating	IP66

For complete junction boxes is necessary to ask to the Sales Office.
Other sizes are available upon request.

INCREASED SAFETY

SB Series - AISI 316 L Stainless steel

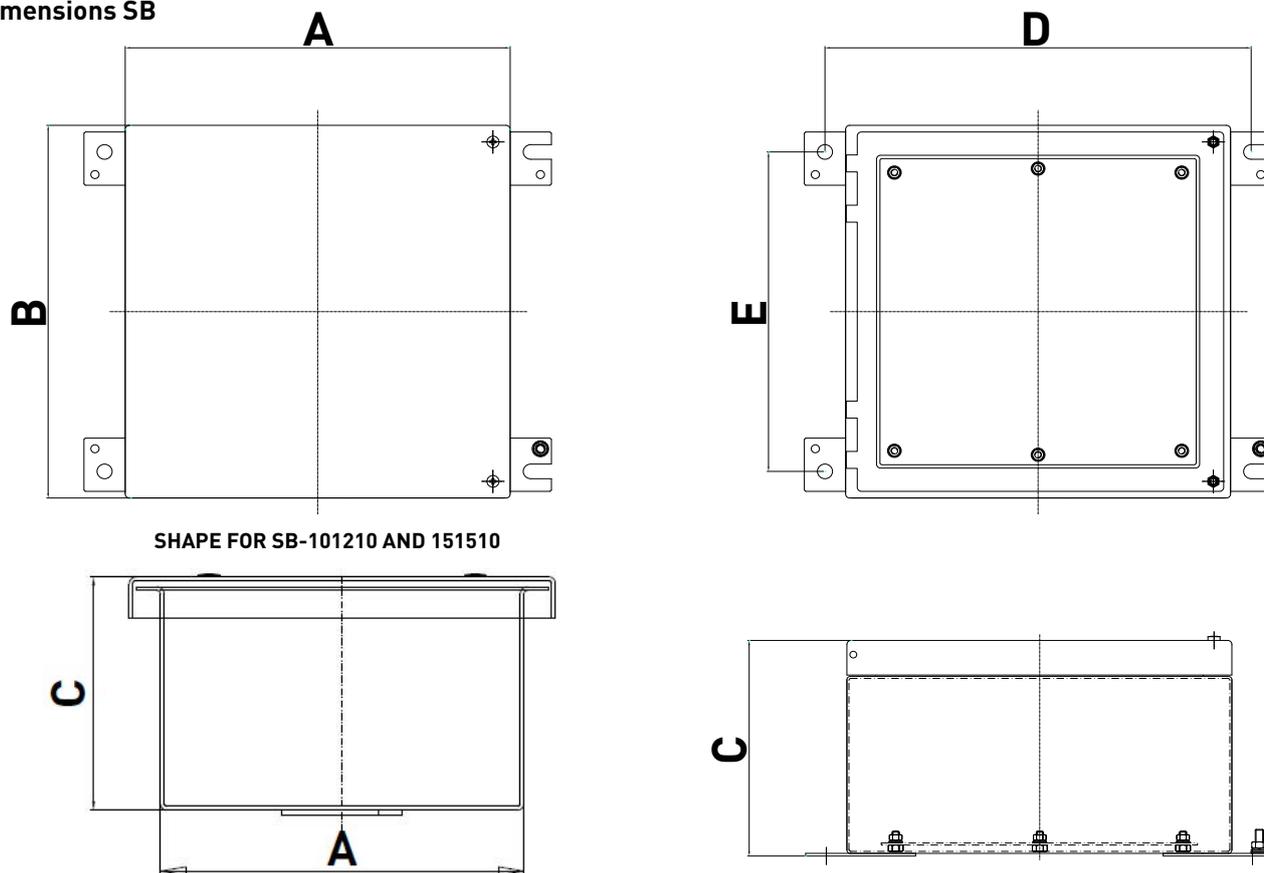

- SB../SBHT.. Series enclosures are suitable for housing Ex e and Ex i terminals and can be provided with internal mounting plate to facilitate terminal board mounting.
- Maximum numbers of terminals varies according to: terminals section and current, enclosure size, operating temperature and required temperature class.
- Suitable for installation in ON/OFF-SHORE plants, in the presence of chemical agents and in any other highly corrosive environment.
- Full customization from 100x120x100 mm to 1500x960x500 mm: our technical department will support you in designing the best solution according to your needs and within the limits of the certificate.
- Full range of off-the-shelf solutions to ensure the best lead time on the market at a competitive pricing.

INCREASED SAFETY

B2X Series - Glassfiber reinforced polyester

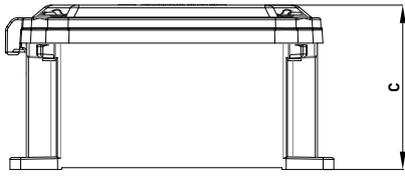

- New high resistance GRP Enclosures, developed and specially designed to host wide range of terminals, multiple power sockets and disconnectors. Tested and certified to be installed and used in extreme site conditions, offshore applications and hazardous areas (Zones 1, 2, 21 & 22 under ATEX and IECEx).
- Their smart and compact design make them easy to install and use in small and hard access spaces.
- B2X certification offers different kind of protection modes in order to satisfy wide range of application (increased safety Ex e, intrinsically safe Ex ia, Explosion proof Ex de in case of Socket junction box combination).

FLAMEPROOF CP../CPS.. Series - Copper-free aluminium

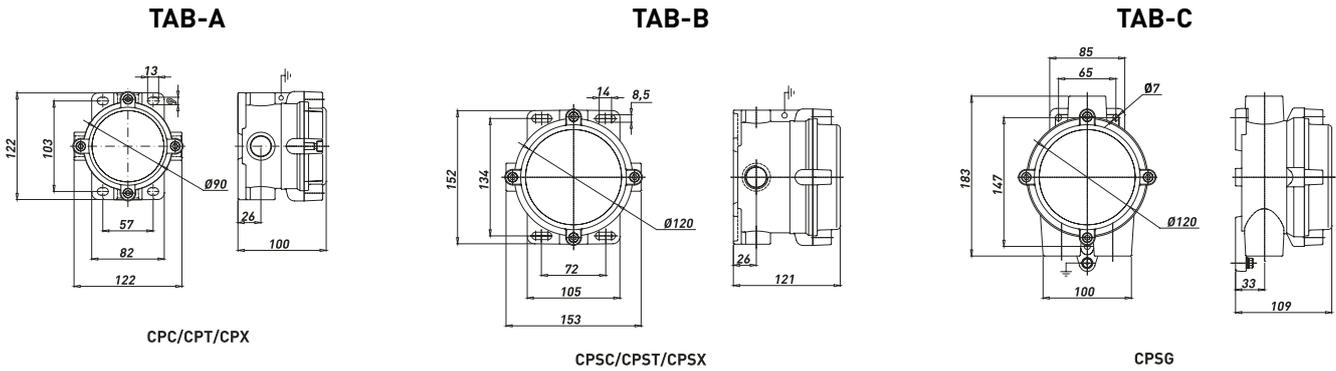

- The CP../CPS.. range of enclosures, used for terminals wiring, grants Ex d or Ex e mode of protection and is suitable for hazardous areas of industrial plants for indoor and outdoor applications.
- Made of copper-free aluminium and complete with threaded hubs suitable for cable glands or conduit, connection does not affect the internal void, which remains available for terminals wiring
- Internal and external screws are made of AISI316 stainless steel.
- This series is tailor made according to customer specifications in terms of quantity and type of operators. Our technical department will select the most suitable solution within the limits allowed by the certificate.

TECHNICAL FEATURES

Material	Copper-free aluminium
IP rating	IP66

FLAMEPROOF

ECR-3 - Drain valve

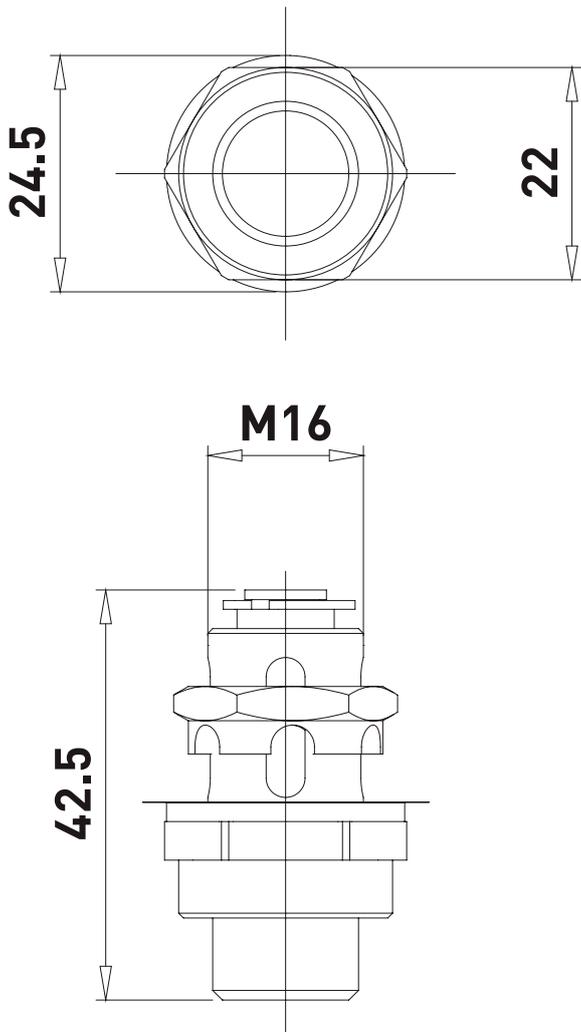

- Drain valve ECR3 is a device intended for use to evacuate the water generated due to condensation inside the enclosure.
 - Drain valve is assembled in the lowest part or side part of the enclosure because the water is accumulated in bottom part of enclosure.
 - Water will come out with the presence of drain valve device.
 - Made of stainless steel or galvanized steel.
 - Gasket is in aluminium.
 - O-ring is in silicon rubber.
 - IP66/IP67 in closed position (IP44 when installed on the bottom or on the side of enclosure*)
- *for detail see instruction note

PRESSURIZED CABINETS

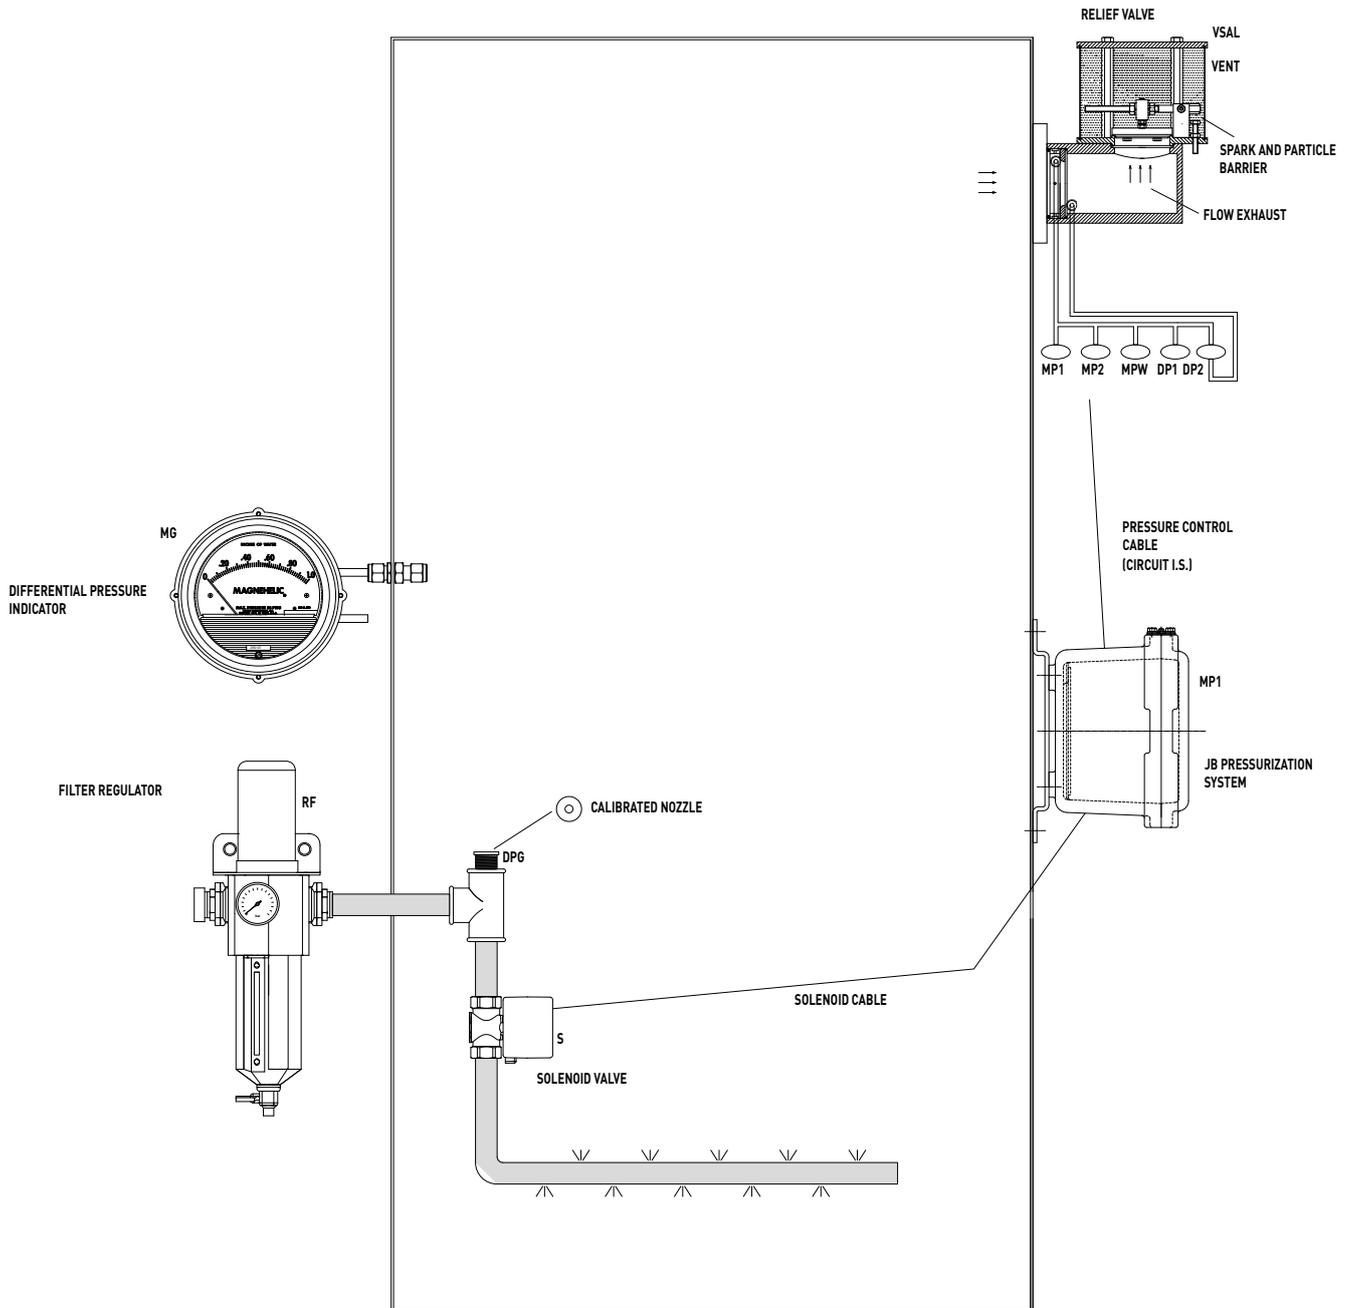

QPREX Series - Stainless steel AISI 316 L

- Modular building system allows to realize customized volume up to 10m³. One of the system that offers the widest possibilities on the market. A single system of pressurization and washing can manage multiple modules in series.
- New gasket technology minimizes the dispersion of inactive gas, increasing efficiency of pressurized system and reduce operating costs
- QPREX pressurized panels, because of the continuous influx of purging gas, prevents the build up of heat and moisture and provide a greater life cycle of the equipment.
- Quick access: easy opening and maintenance, when the doors open the system disconnects; when the doors are closed again, after the washing cycle, the system will start again automatically.
- In QPREX can be mounted non Ex components.
- Logic TEX1 first company with SIL2 (Safety Integrity Level).

GAS GROUP IIB + H₂

EJB.. Series - Stainless steel AISI 316 L/Galvanized Carbon Steel

EJB.. series enclosures offers Ex d IIB or IIB+H2 mode of protection. They are suitable for hazardous areas of industrial plants for indoor and outdoor applications. They can be equipped with following components:

- Push buttons and mechanical operators PL.. Series;
- Rotating switches PSRC Series;
- Signalling lamps PL.. Series;
- Potentiometers;
- Rotating handles SRC-1 or SRC-10;
- Measurement instruments;
- Electric and electronic equipment;
- Windows made of tempered glass.

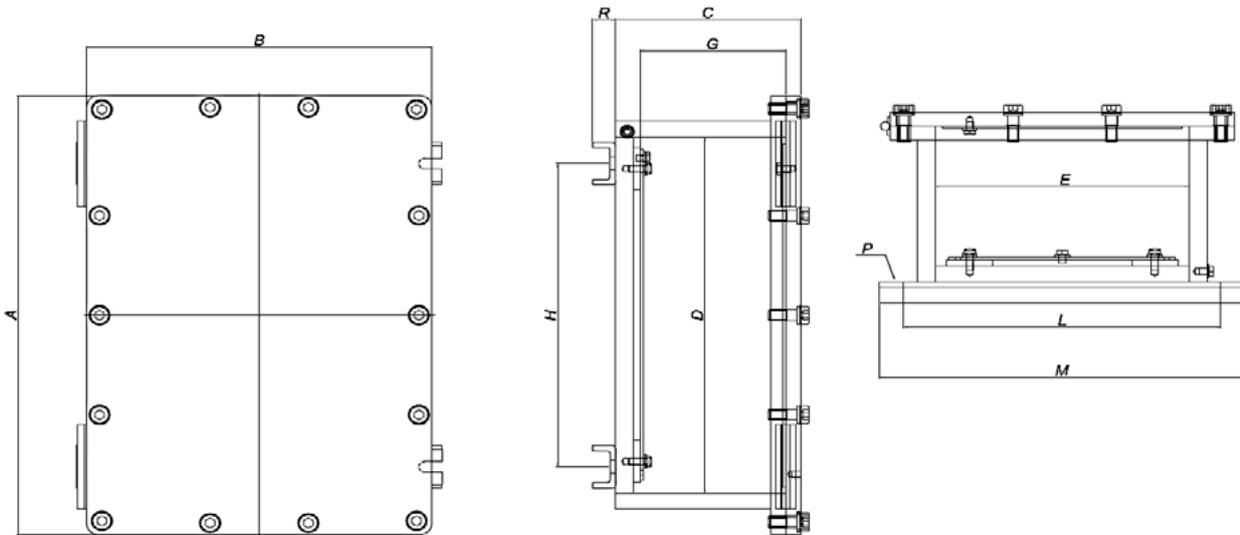

They can be used in different applications such as push button stations, instrument housing, lighting distribution panels, power distribution panels, heat tracing panels, motor protection, etc.

TECHNICAL FEATURES

GAS GROUP IIC

GUB.. Series - Copper free aluminium or Stainless steel AISI 316 L

GUB.. series enclosures offers Ex db IIC mode of protection.

They are suitable for hazardous areas of industrial plants for indoor and outdoor applications.

GUB version can be equipped with following components:

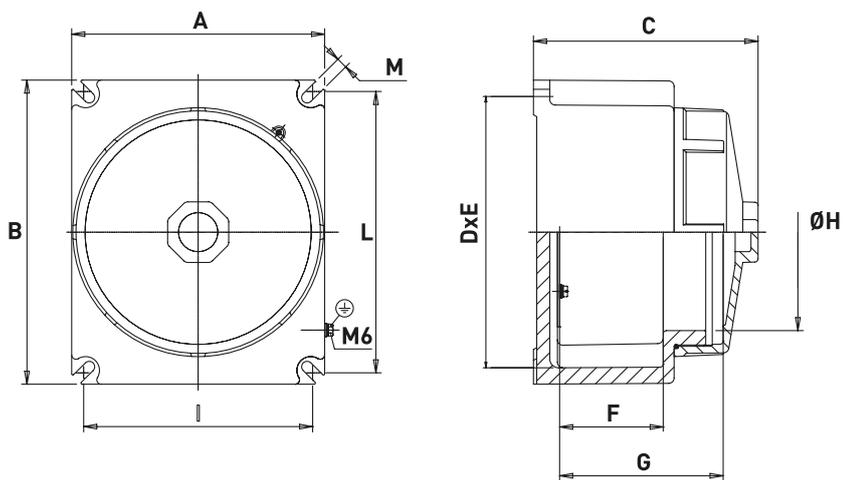

- Signalling lamps PL.. Series;
- Measurement instruments (weight; pressure; damp; level; temperature and capacity);
- Electric and electronic equipment;
- Instruments of measure of electric parameters;
- Electronic thermoregulation units;
- Radio communication and telephony units;
- PLC and multiplexer;
- Controlling device;
- Automatic and/or earth leakage circuit breakers.

They can be used in different applications such as push button stations, instrument housing, lighting distribution panels, power distribution panels, heat tracing panels, motor protection, etc.

TECHNICAL FEATURES

GAS GROUP IIC

GUB../QL Series - Copper-free aluminium or Stainless Steel AISI 316 L

GUB.. series enclosures offers Ex db IIC mode of protection.

They are suitable for hazardous areas of industrial plants for indoor and outdoor applications. GUB.. QL version can be equipped with following components:

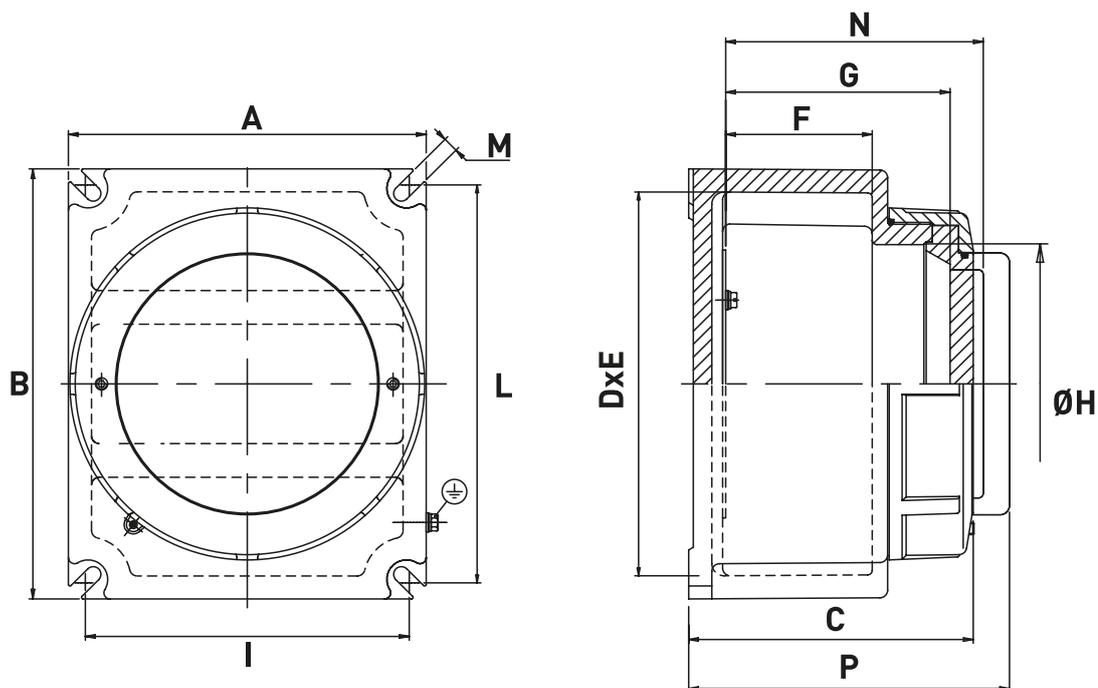

- Push buttons and mechanical operators PL.. Series;
- Rotating switches PSRC Series;
- Signalling lamps PL.. Series;
- Potentiometers;
- Rotating handles SRC-1 or SRC-10;
- Measurement instruments;
- Electric and electronic equipment;
- Windows made of tempered glass (GUB-QL07).

They can be used in different applications such as push button stations, instrument housing, lighting distribution panels, power distribution panels, heat tracing panels, motor protection, etc.

TECHNICAL FEATURES

GAS GROUP IIC

GUB/EMH.. Series with window - Copper-free aluminium or Stainless Steel AISI 316 L

GUB/EMH.. series enclosures offers Ex dB IIC mode of protection.

They are suitable for hazardous areas of industrial plants for indoor and outdoor applications. GUB/EMH version is equipped with window made of tempered glass and with following components:

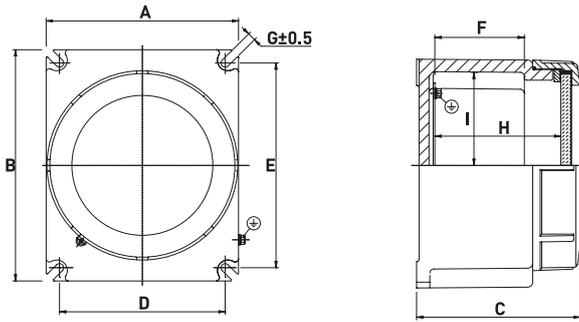

- Push buttons and mechanical operators PL.. Series;
- Rotating switches PSRC Series;
- Potentiometers;
- Rotating handles SRC-1 or SRC-10;
- Measurement instruments;
- Electric and electronic equipment;
- Windows made of tempered glass.

They can be used in different applications such as push button stations, instrument housing, lighting distribution panels, power distribution panels, heat tracing panels, motor protection, etc.

EARTHING SYSTEMS

GUMT - Earthing control system - Copper-free aluminium

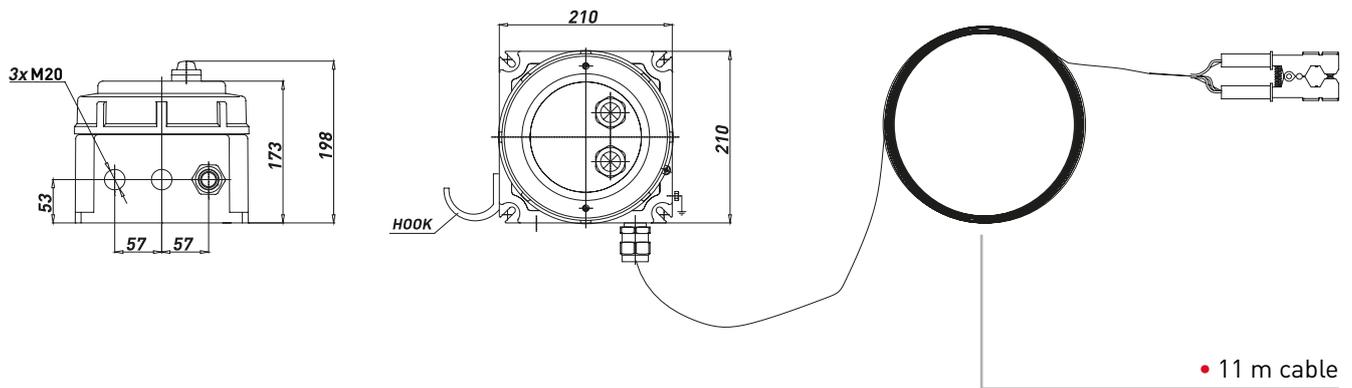

- Control and discharge system for electrostatic charges suitable for road tankers, rail tankers and any movable tanker for dangerous items
- Ready for one/two double circuit clamps PTA ISE0-2
- The system is complete with arrest/consensus optical warning and changeover contact free from output voltage.
- This solution is able to control the discharge of static charges driving it through a dedicated and safe path, safe because Explosion proof.

TECHNICAL FEATURES

Material	Copper-free aluminium
IP rating	IP65/IP66

EARTHING SYSTEMS

PTA Earthing clamp

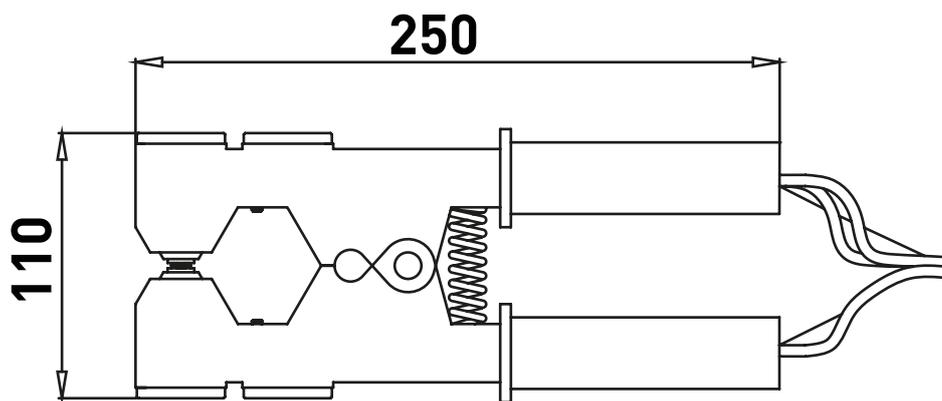

- Reliable, robust, handy and easy to use, PTA Series clamps are the ideal tool for tanker loading platform equipped with electronic devices to signal correct grounding
- They can be easily connected to any grip, even rusty ones
- PTA Series is made of copper-free aluminium and the electrical continuity is ensured by the carbonitrided steel contact tips, which make a firm connection to any foothold having a thickness between 2 and 20 mm.

- Range of rotating lamp visual signals, available in two versions, 25W and 45W
- Copper-free aluminium body and tempered glass lamp compartment ensure an excellent corrosion resistance
- EVCC and EVA version available upon request.

TECHNICAL FEATURES

Material	Copper-free aluminium body Tempered glass lamp compartment
IP rating	IP66
Ambient temperature range	-52°C to +60°C
Approvals	ATEX: INERIS 01ATEX0019X - IECEx: INE 15.0031X EAC: RU C-IT.BH02.B.00616/20 – ECAS: 21-04-10282 E21-04-021858
Marking	II 2 GD Ex d IIC T(**) Gb for all EV.. Ex de IIC T(**) Gb for all Evde.. Ex tb IIIC T(**) Db IP66 ** T5/T100°C, T4/T135°C
Gaskets	O-ring made of Nitrile Rubber (NBR)
Surface treatment	Polyurethane painting cycle - Blue colour RAL5014 (other colour available upon request)
Entries	N° 2 entries M25x1,5 (EVde and EVCC version) N° 1 entry M25x1,5 (EVA version) (plugs and cable glands excluded)
Included accessories	AISI304 Stainless steel external hardware and screws
Lamps	Included
Colour	Red (other colours available upon request)
Rated operation voltage (UE)	240Vac, 12Vdc, 24Vdc 12Vac, 24Vac, 48Vac, 48Vdc, 110Vac (available upon request)
Frequency (AC version)	50/60Hz
Optional accessories	Protection guard

*In case of maximum ambient temperature reaches +40°C, temperature class changes into T5 (ordering code to be required)

VISUAL SIGNAL

EV../XN-MXN Series - Flashing lights - Copper-free aluminium

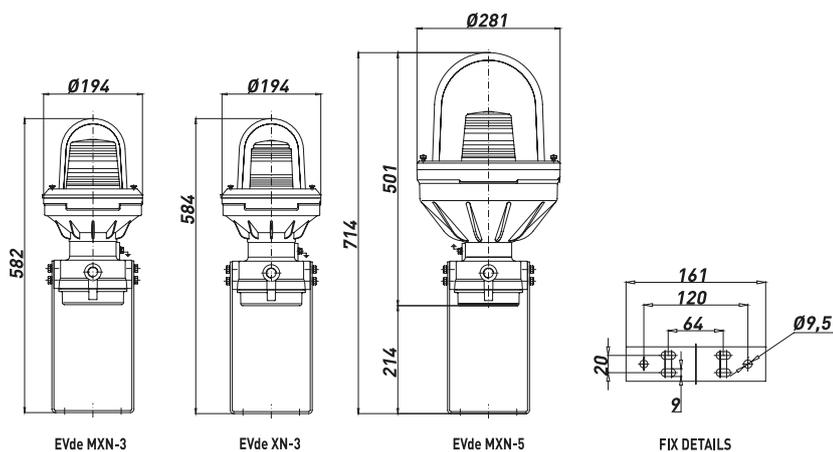

- Range of xenoflash visual signals complete with Fresnel lens, available in different luminous intensities, 2J , 6J and 15J
- Copper-free aluminium body and tempered glass lamp compartment ensure an excellent corrosion resistance
- EVde version, with integrated Ex e junction box, allows end users and contractors the possibility to save one junction box, two cable glands and a minimum of 30 minutes of labour during installation process. This version is supplied complete with an adjustable AISI304 stainless steel mounting bracket suitable for ceiling, wall and suspension installation.
- EVCC version, without integrated Ex e junction box, allows standard ceiling installation (available upon request).
- EVA version, without integrated Ex e junction box, allows standard suspension installation by conduit system and pastoral pole (available upon request).

VISUAL SIGNAL

EVCC.. series - MIOL (Medium intensity obstruction lighting) - Copper free aluminium

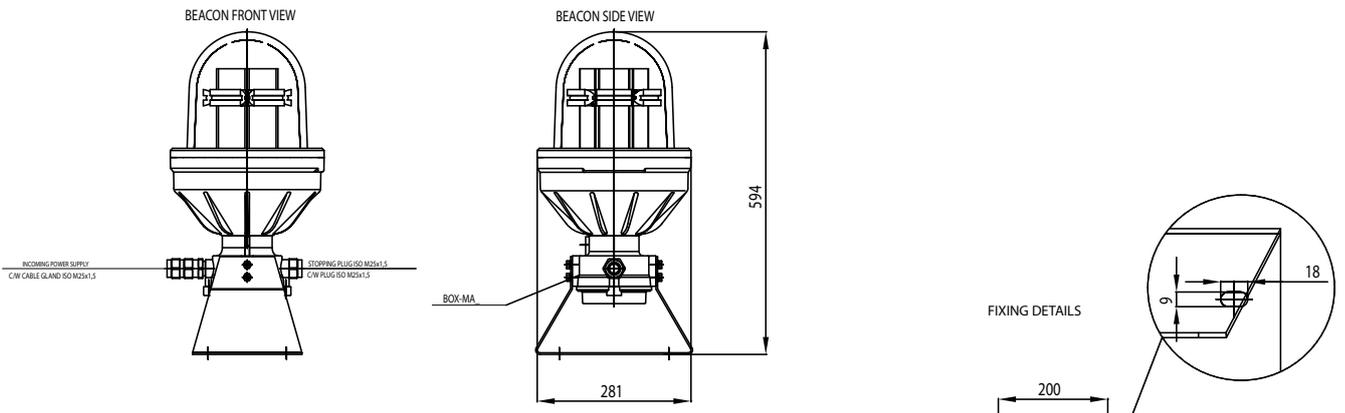

- The EVCC-5/...LED range of medium intensity obstruction lighting represents the top of technology, using LED technology to deliver low heat dissipation, low watt consumption and up to 100.000/hours maintenance free operation.
- Aircraft warning lighting fixtures EVCC-5/...LED are multi-light source using high-power LEDs with wide beam.
- The product is fully compliant with ICAO Annex 14, which requires that structures over 45m should incorporate medium intensity lighting fixtures
- Available LED colours: RED, WHITE or RED and WHITE.

METALLIC CABLE GLANDS

PSM (Male-Male)

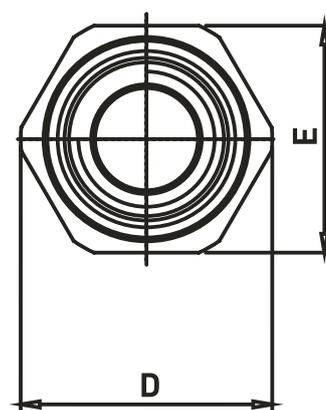

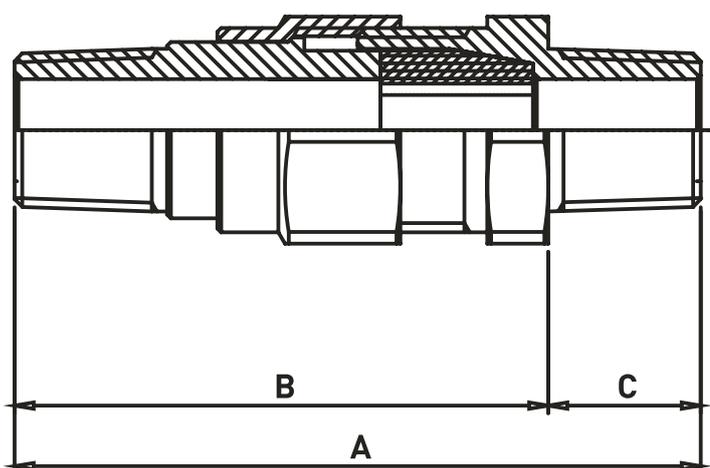

Single seal through "male-male" cable gland suitable for unarmoured cables.
Suitable for Zone 1/2 and Zone 21/22.

TECHNICAL FEATURES

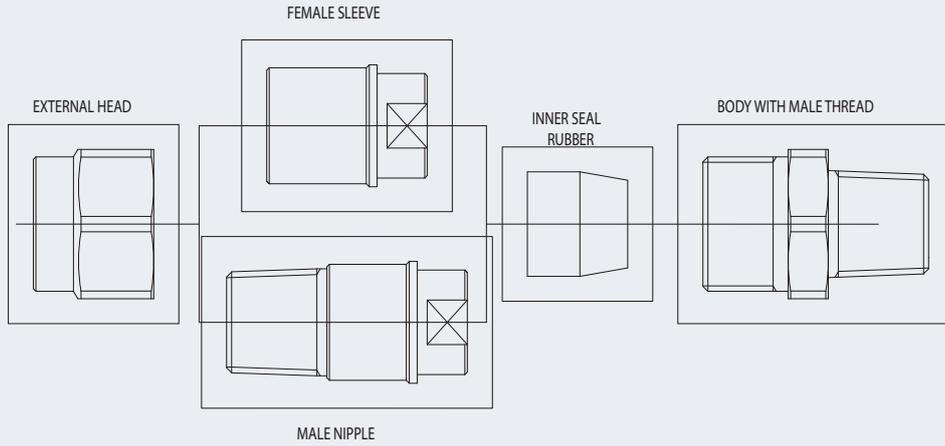

Material	Nickel chrome plated brass AISI 316 L Stainless steel (other materials upon request)
IP rating	IP66
Operating temperature range	-52°C to +110°C
Approvals	ATEX: 02ATEX0084 IECEX INE 14.0046X EAC: RU C-IT.BH02.B.00596/20
Marking*	II 2 GD Ex db/eb IIC Ex db/eb I Ex tb IIIC IP66 I M2 Ex db/eb I * For group I certification is up to size 6.
Internal seals	EPDM
Threads	Metric, NPT, UNI-6125 (other thread upon request)
Optional accessories	Locknut, sealing gasket, earthing ring, star washer, protective shroud
Note	The Free Nipple thread can be provided Metric, NPT or UNI-6125

FITTINGS

BMF/BFF/BMM Series - Three pieces unions

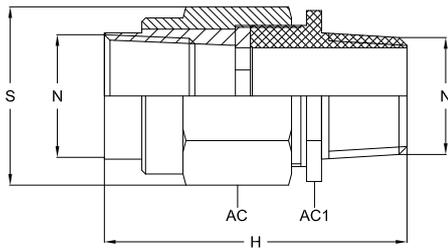

Three pieces unions for gas group IIB enable an independent rotation and the connection between pipes of an electrical equipment and enclosures or different devices of an explosion-proof equipment.

- BFF series (female/female)
- BMF series (male/female)
- BMM series (male/male)

TECHNICAL FEATURES

Material	Galvanised steel (other materials upon request)
IP rating	IP66/IP67
Ambient temperature range	ATEX Galvanised steel: -20°C to +60°C with EPDM gasket Stainless Steel: -55°C to +60°C with SI/50 gasket (upon request) IEC Ex Galvanised steel: -20°C to +60°C with SILICON gasket (upon request) Stainless Steel: -50°C to +60°C with SILICON gasket (upon request) Special version suitable for high temperature +150°C is available upon request (the suffix become RBMF...)

FITTINGS

EYS Series - Sealing fittings

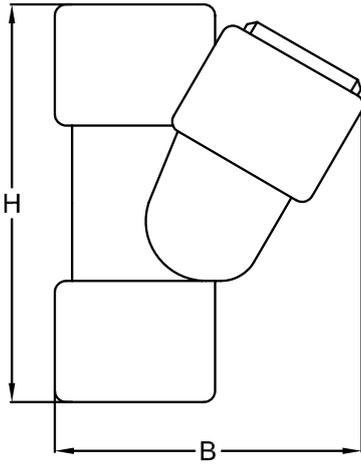

Sealing fittings prevent the passage of gas, vapors or flames through pipes system. EYS series vertical fittings are available in two different dimensions: the first up to 1"; the second up to 3" with an additional lateral opening for easy insertion of glass-fiber. EYS series are used for both vertical and horizontal mounting. The fittings must be installed as close as possible to the Ex d junction box and must be filled using CRV 420 approved resin. The sealing compound is supplied, in the quantity indicated in the table below, along with the sealing fitting. Other sealing compounds are not allowed.

TECHNICAL FEATURES

Material	Aluminium with low content of copper
IP rating	IP66
Ambient temperature range	-20°C to +100°C
Approvals	IECEX CES 14.0019X CESI 03 ATEX 085 EAC
Marking	II 2GD Ex db IIC Gb Ex tb IIIC Db IP66
Thread	NPT, UNI-6125 (other threads upon request)
Optional accessories	CRV420 sealinig compound, fiber.

FITTINGS

LBH Series - Open elbows

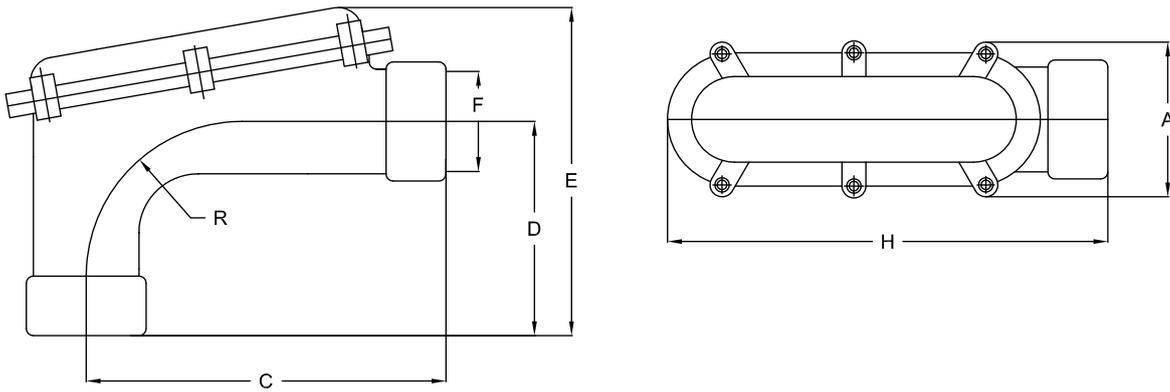

LBH and LBHS series L shaped open elbows are used for the cables run in conduit system of electrical installations.
The flanged opening enables easy inspection and insertion of electrical cables.

TECHNICAL FEATURES

Material	Aluminium with low content of copper
IP rating	IP66/IP67
Ambient temperature range	ATEX (-20°C,+60°C)
Approvals	CESI 03 ATEX 141U EAC
Marking	II 2 G Ex d IIB
Thread	NPT, UNI-6125 (other threads upon request)

Dimensions LBH

FITTINGS

DB Series - Aluminium bushings

DB...A series bushings are made of aluminium. They are screwed to the pipe and they work as a cable guard. They prevent the cable from rubbing on any pipe burr/edge which could damage its sheath.

TECHNICAL FEATURES

Material

Aluminium with low content of copper

Thread

NPT, UNI-6125 (other thread upon request)

FITTINGS

A../F../M../R.. Series - Reductions and adaptors

Reductions and adaptors are used to connect pipes of an electrical equipment and enclosures or different devices of an explosion-proof equipment with different entries sizes.

TECHNICAL FEATURES

Material	Nickel chrome plated brass AISI 316 L Stainless steel
IP rating	IP66/IP68
Ambient temperature range	-40°C +100°C with EPDM or Nylon gaskets -65°C +220°C with Silicone gaskets -65°C +400°C without gaskets
Approvals	Certified 12ATEX 0089X IEC Ex INE 10.0014X EAC
Marking	II 2GD Ex d/e IIC Gb Ex tb IIIC Db IP66/68 I M2 Ex d/e I Mb
Thread	ISO METRIC pitch 1,5, NPT, UNI-6125 (other thread upon request)

PLUGS & SOCKET-OUTLETS

MXBS - Socket outlet combination boxes

These socket outlet combination boxes, available in different materials and sizes, are designed for making electrical connections in hazardous areas. They can be equipped with 5 to 680A Marechal decontactors and/or 10 A Marechal multicontact connectors, offering from 12 to 37 contacts. They provide increased and intrinsic safety, allowing them to be used in zones 1 & 2 (gas), 21 & 22 (dust).

This comprehensive range is perfect for wet and corrosive environments, such as food and beverage or chemical industries, thanks to its specific and high quality materials. It is possible to mount both socket-outlets and multicontact connectors on the same box: DXN1, DXN3, DXN6, PXN12C, DXN25C, DXN37C, SPeX, DXA1 and PNCX.

TECHNICAL FEATURES

Material	Enclosure: Stainless steel AISI316L, GRP or Aluminium Socket: GRP and/or Aluminium
IP rating	IP66
Ambient temperature range	-55°C to +60°C
Approvals	LCIE 17 ATEX 3005 X (Standard) IECEX LCIE 17.0003X (marking upon request) EAC (available for certificate INERIS 06 ATEX 0015)
Marking	II 2 GD Ex eb IIC T(**) Gb or Ex ia or ib IIC T(**) Gb or Ex eb ia or eb ib IIC T(**) Gb Ex tb IIIC T(**) Db IP66 ** T6/T80°C, T5/T95°C, T4/T105°C, T127°C, T130°C
Frequency	50 and/or 60Hz in AC
Electrical parameters	Ex eb: $U_{max}=1000\text{ V AC/DC}$; $I_{max}=376\text{A}^*$ (wiring with terminals); $I_{max}=680\text{A}^*$ (direct wiring) Ex ia/Ex ib: $U_i \leq 750\text{ V}$; $I_i \leq 400\text{A}^*$ Ex eb ia/Ex eb ib: $U_i \leq 750\text{ V}$; $U_m \leq 750\text{ V}$; $I_i \leq 400\text{A}^*$ * The electrical parameters must be reduced, if relevant, according to the limitations of certified equipments used.
Standard certificate label	Made by self adhesive UV and corrosion resistant polyester, approved by certified Laboratory.
Optional accessories	Drain/breather valve Traffolyte/Stainless steel certificate label Cable glands Terminals Plug

PLUGS & SOCKET-OUTLETS

FPR - Plugs - GRP

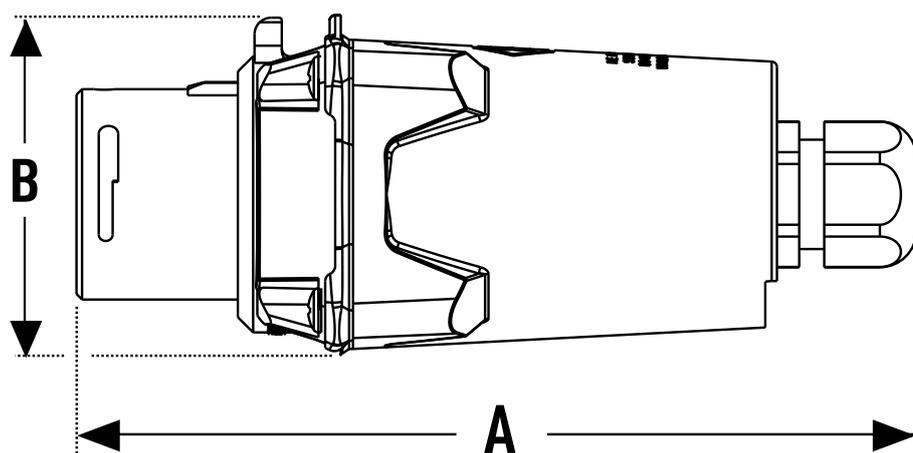

Plugs based on DXN technology, compatible with socket outlet & welding receptacles series: FSR, FSX, FSAL.

Made of self-extinguishing non-static glass reinforced polyester (PBT), DXN DECONTACTOR™ can withstand heavy duty, severe mechanical stress and presence chemical aggressive products .

TECHNICAL FEATURES

⚠ II2 G D Ex e IIC

- IP65/IP66 water- and dust-tight
- Electromechanical interlocking system
- Mechanic and visual keying
- High performance poly casing

DXA1

DECONTACTOR™ MÉTAL Up to 20 A

⚠ II2 G D Ex de IIC, Ex tb IIIC

- Integrated load-break switch
- IP66/67 water and dust tight
- Corrosion-free metal casing
- Lockable in connected or disconnected position with optional lockout shaft
- Low temperature rating of -55°C

PNCX

COMPACT CONNECTOR - 5 A

⚠ II2 G D Ex e IIC, Ex tb IIIC

- Can be used in zones 1 and 2 (gas), 21 and 22 (dust)
- Compact and easy to use
- Standard IP66/IP67
- Long life, 2000 operations

INDUSTRIAL PRODUCTS

Industrial power supply/Signal & control/ High current/High Temperature/Self- ejecting systems/Boxes

This extensive and comprehensive product range covers all industrial applications. With sizes varying from 5 A to 700 A, it offers a wide range of options.

TECHNICAL FEATURES

INDUSTRIAL POWER SUPPLY

DECONTACTOR™ & CONNECTORS 16 A to 250 A

The DSN, DS and DN DECONTACTOR™ ranges cover applications from 20 A to 250 A making them the most versatile for industry. PNC and PN are compact 16 A and 30 A connectors design for all type of environment (humidity, corrosion, pollution ...) found in many industrial sectors. DB disconnectable motor switches combine the function of an AC-3 motor switch with the convenience of a plug and socket.

SIGNAL & CONTROL

MULTICONTACT CONNECTORS 5 to 37 contacts - 5 A to 30 A Low currents: 4 mA to 20 mA, 16 A

Our multicontact connectors Can hook up equipment to a power supply and transmit data. The silver-nickel alloy used for the butt contacts provides exceptional conductivity and longevity (can withstand several thousands of operations). The casing is available in GRP or metal to ensure excellent resistance – even in harsh conditions. And because the contacts are crimped, the connectors can be mounted and demounted quickly and easily.

HIGH CURRENT

PLUGS & SOCKETS AND CONNECTORS

Up to 750 A - 1 000 V

MARECHAL® high-current plugs offer a reliable solution for connections even under the harshest environments.

HIGH TEMPERATURE

DECONTACTOR™ & CONNECTORS

25 A to 125 A

This range of power connectors and signal & control connectors, provides excellent connection quality in high-temperature environments, up to 400 °C.

SELF-EJECTION

DECONTACTOR™ & RETTBOX®/ RETTBOX®-AIR

**Mechanical ejection up to 150 A
Electromechanical ejection boxes up
to 32 A - 13 bars**

Self-ejecting systems avoid the need to disconnect electrical equipment, allowing a mobile device to be moved without unplugging it, or where equipment is located in high-risk areas.

BOXES

SOCKET-OUTLETS WITH PROTECTION UP TO 63 A TUNNEL APPLICATIONS BOXES

MARECHAL® offers a wide range of boxes for all industrial applications and a large choice of products designed specifically for power-supply in tunnels.
